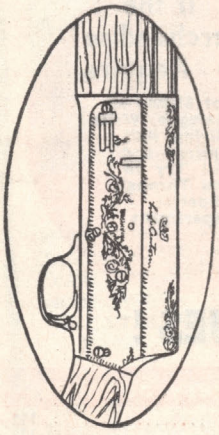
BROWNING

Automatic-5 Standard and Magnum



Close Up View Showing Designs on Receiver. Trigger on Lightweights Are Gold Plated.

THE BROWNING AUTOMATIC-5 has features which make it ideally appropriate for all kinds of shotgun hunting, skeet or trap shooting.

- **Designed to shoot all loads—from the most powerful long-range loads to the lightest field or target loads.**
- **Five fast shots and an adapter provided to reduce the capacity to three.**
- **Smooth speed loading for either right or left handers.**

NEW, EXCLUSIVE—No other gun will load as fast from shooting position through reload to shooting position—five shells in six seconds.

MAGAZINE CUT-OFF—It is not necessary to empty the magazine in order to remove or replace the shell in the chamber. Loads can be changed quickly.

SHOCK ABSORBER—The AUTOMATIC 5 contains a particularly efficient friction system which absorbs and diverts a great deal of shock from the shoulder. It also prevents needless wear on the gun's mechanism.

STRAIGHT SIGHTING PLANE—The square end of the receiver is designed to facilitate quick, accurate alignment.

SAFETY—The positive cross bolt safety is conveniently located behind the trigger; right or left hand optional.

FINISH, ENGRAVING, AND MATERIALS—The exposed parts are hand polished, then blued. Tasteful, hand-engraved designs on the receiver and trigger guard. The forearm and stock are of carefully selected French walnut; hand checkered for solid grip. Length of pull, 14¼ inches except on the 3-inch magnum which is 14 inches. Drop at comb, 1⅝ inches; drop at heel, 2½ inches.

CHAMBERING—For all 2¾-inch factory loads, including 2¾-inch Magnum, except in the 3-inch Magnum which is chambered for 3-inch Magnum shells as well as 2¾-inch Magnum and 2¾-inch x 1¼-oz. high velocity loads.

SIGHT—Medium bead raised for quick orientation.

3-In. MAGNUM — 12 Gauge — 32-In. Barrels

3-Inch Magnum 12 Models—Whether one needs extra long range—or heavier pellet concentration and penetration for larger bodied game, the 3-inch Magnum 12 provides maximum fire power with a fast, sure, automatic action. The long 32-inch barrels supply the necessary forward weight and enlightened sighting plane for accurate distance shooting. Tight full choke barrels deliver dense pellet concentration at longer yardage. A special recoil absorber and recoil pad are standard equipment on this powerful gun. The kick is not unpleasant with even the heaviest 3-inch, 12 gauge loads. It accepts up to and including the 3-inch, 1⅞ ounce, 12-gauge Magnum load which contains only ⅛ ounce of shot less than the maximum 3½-inch, 10-gauge load. Yet when shooting conditions do not require such heavy loads, the 2¾-inch Magnums and 2¾-inch x 1¼-oz. high velocity may be used with equal pattern efficiency.

SATISFACTION GUARANTEED or Money Refunded

Superposed and Double Automatic

SUPERPOSED—12 Gauge, Modified, Full Choke

Two Guns in One with Single Sighting Plane—Two-barreled shotgun with barrels mounted one above the other.

JUST THE RIGHT BALANCE — Easy to carry and comes to the shoulder almost effortlessly.

SINGLE SELECTIVE TRIGGER—One trigger fires either barrel. You may fire either barrel first, by a quick and simple manoeuvre of the "barrel selector". The trigger is positively locked whenever the gun is not completely closed.

AUTOMATIC EJECTORS—Flip the spent shells out automatically when the gun is opened.

SAFETY—Manual, combined in thumb-piece with selector mechanism.

TAKE-DOWN SYSTEM—The barrels and fore-arm may easily and rapidly be removed from the stock portion of the gun.

CHAMBERING—All 12 gauge models accept shells up to and including 2¾ inches, in all factory loads.

STOCK AND FOREARM—Finest select walnut, hand checkered. Length of pull 14¼ inches. Drop at comb, 1⅝ inches; drop at heel, 2½ inches.

RECEIVER—Blued steel with hand engraved graceful scroll and rosette design.

SIGHTS—Medium raised bead.

WEIGHT—7 lbs., 12 ozs.

Standard 12—
28-Inch Raised Rib.
CATALOGUE No. 5B01.
DELIVERED **$260.00**

Standard 12—
28-Inch Ventilated.
CATALOGUE No. 5B02.
DELIVERED **$280.00**

SUPERPOSED Magnum 12

Chambered to the 3-inch cartridge for extra long range and penetrating power. Will also shoot 2¾-inch cartridge from the lightest to the heaviest velocity with equal pattern perfection. 30-inch barrels, ventilated rib. Fitted with recoil pad. 8 lbs. 4 oz.
CATALOGUE No. 5B03—DELIVERED..... **$285.00**

DOUBLE AUTOMATIC — 12 Gauge, Full Choke

SHORT RECOIL SYSTEM—Floats the barrel to a cushioned rest against balanced springs.

PERFECT BALANCE—Extremely short receiver and calculated distribution of the recoil mechanism in the trim fore-arm.

NO ADJUSTMENT—Is necessary for different loads.

BETTER TRIGGER PULL—An improved hammer mechanism permits a quick hammer fall.

NEW CONVENIENT SAFER SAFETY—Placed on the rear of the trigger guard.

CONVENIENT SPEED LOADING—Equally pleasing to right or left hand shooters. Convenient loading port on left side of receiver.

TWO-FINGER TAKE-DOWN—Press the latch, flip down the rear of the forearm, and draw out the barrel, that's all.

STOCK AND FOREARM—Select French walnut. Finely hand checkered, full pistol grip. Length of pull, 14¼ inches. Drop at comb, 1⅝ inches; drop at heel, 2½ inches.

CHAMBERING—For all 2¾-inch factory shells, including 2¾-inch Magnum. However Magnum shells are not recommended for the Twenty weight.

RECEIVERS—Delicately hand-engraved on both sides of receiver and trigger guard.

STANDARD MODEL—Blued steel.

TWELVETTE—Lightweight alloy in a choice of either satin grey and silver or dragon black and gold.

TWENTY WEIGHT—Lightweight alloy, dragon black and gold.

SIGHT—Medium bead raised for quick orientation.

WINCHESTER

Model 12 Slide Action Shotguns

So well does this gun shoot, handle and work, that for years, critical experts representing every branch of shotgun shooting, have pronounced it **"THE PERFECT REPEATER."** Only the finest gun steels are used and the rugged simplicity of its operation is particularly suited to fast shooting, long and trouble-free performance. Finish and proportion of all parts give **MODEL 12** an unsurpassed sleekness. Its fine balance, pointing and swinging qualities are evident the moment it's in your hands or thrown to the shoulder. Receiver is one piece—closed at rear. Breech bolt is short and solid. Positive cross-lock safety and triple safety reloading mechanism. Takedown system the ultimate in ease and simplicity.

MODEL 12 Specifications

BARREL—Winchester proof-steel, noted for strength, uniformity and pattern performance, full choke.
STOCK—Pistol grip stock and slide handle of American walnut.
ACTION—Lightning fast Winchester, jam-proof slide action.
MAGAZINE—Tubular magazine holds five shells. Furnished with magazine plug to reduce capacity to two shells.
SAFETY—Positive cross-lock safety, operating horizontally across front of trigger guard.

20 Ga.—28" Barrel

$133.50

Cat. No. 7B01—Delivered

FULL CHOKE

The all new Winchester Model 50 Automatic shotgun works through an entirely different and revolutionary principle. When the Winchester Automatic is fired, the barrel remains stationary, fixed, rigid. The chamber moves back a fraction of an inch and starts the action on its way. Surely and smoothly, the Winchester easy-action Automatic flips out the empty and picks up a loaded shell, and you're ready for a really fast second shot. The easy, positive action of the Model 50 does its fast, smooth job every time, in spite of weather, weed-seeds or dirt.

Easy to Field Strip and Put Together—Can't be put together wrong, you can put it togther or take it down without tools. Directions are simple and easy to follow.

SPECIFICATIONS:— Action — Self-loading (semi-automatic). Shoots as fast as you pull the trigger. Interrupted trigger, absolutely no chance of this gun going full automatic.

Capacity—Three shots; one in chamber, two in magazine.

Barrel—Bored from a single bar of Winchester Proof-Steel. No thin spots Uniform in thickness from breech to muzzle.

Receiver—Milled from a single brawny block of tough Winchester Proof-Steel. The receiver of the Winchester Automatic can't wear out; will last a lifetime. **Safety**—Time-tested **and proven Winchester cross-bolt safety. Weight**—12 gauge: approximately 7¾ lbs. 20 gauge: approximately 6¾ lbs.

Model 50 — With Rib

Gun shoots "dead on", hot or cold, exactly where pointed. Winchester special ventilated rib permits barrel and rib to expand or contract independently. All other specifications are the same as above except weight which is approximately 8 lbs.

Catalogue No. 7B02—DELIVERED $175.00

Model 50 — Featherweight

The receiver is fabricated Allumalloy with field-proven strength, safety margin and durability—the barrel of famous heat-treated Winchester Proof-Steel. All other specifications are the same as above except weight.

16-20 Ga., 28-inch Barrel

THE "Wingmaster" SERIES PUMP ACTION SHOTGUNS

"VARI-WEIGHT" PRINCIPLE—Now you can have three guns in one. The "Wingmaster" Model 870 (12 gauge only) is furnished with both a 3-shot 12-oz. steel "Vari-Weight" plug and the regular 3-shot wooden plug at no extra charge. By varying these plugs you can have (1) A lightweight 5-shot capacity gun (about 7 lbs.) without any plug. (2) A lightweight 3-shot capacity gun (about 7 lbs.) with the wooden plug. (3) A medium-weight 3-shot capacity gun (about 7¾ lbs.) with "Vari-Weight" plug.

SPECIFICATIONS—The barrel and breech block lock together for instant interchangeability of barrels. Double action bars for greater strength and positive operation. The barrel and breech block are locked together for utmost safety. Light snappy trigger pull. Chambered for 2¾-inch shells. Side ejection. Cross-bolt safety. Top of receiver matted. Takedown. Hammerless. Solid breech. **Stock**—14 inches long, 2½-inch drop at heel, 1⅝-inch drop at comb. **Weight**—12 gauge, 7 lbs.; 16 gauge, 6¾ lbs.; 20 gauge, 6½ lbs.

MODEL 870AP—12, 16 or 20 gauge. Plain barrel, full choke.
CATALOGUE No. 9B02—PRICE, DELIVERED **$84.50**

MODEL 870AP, "RIB"—12 gauge. Equipped with raised, ventilated rib.
CATALOGUE No. 9B03—PRICE, DELIVERED **$109.50**

MODEL 870ADL DELUXE—12, 16, 20 gauge. Plain barrel, full choke, fine checkered stock with decorative grip cap; black butt plate; long extension beavertail fore-end, checkered with finger grooves; top surface of barrel fully matted.
CATALOGUE No. 9B04—PRICE, DELIVERED **$97.50**

MODEL 870BDL, DELUXE—12 gauge. Same as above but with selected, figured American walnut stock and fore-end. Beautifully checkered.
CATALOGUE No. 9B05—PRICE, DELIVERED **$112.50**

MODEL 870ADL, DELUXE, "RIB" — 12 gauge. Same as 870ADL but with raised, ventilated rib.
CATALOGUE No. 9B06—PRICE, DELIVERED **$122.50**

12 Gauge, 3 Shot *Pump Action*

● FAST POINTING ● FAST LOADING ● FAST REPEATING

BARREL—Tapered blue steel, 28-inch, including C-LECT-CHOKE. Surfaces inside and out PRECISELY CONCENTRIC from chamber to muzzle. Chambered for all 2¾-inch factory loaded shells including new 2¾-inch Magnum. Takes rifled slugs for deer and big game.

STOCK—Full length, genuine American walnut, Monte Carlo design cushion rubber recoil pad, checkered nylon fore-end. Molded trigger guard with finger grooves in grip.

ACTION—Double action slide assures smooth operation. Detachable clip magazine, holds two shells plus one in chamber. Disconnecting trigger avoids dangerous, inadvertent "doubles." Firing position indicator. Red and green safety buttons inlaid in stock—thumb operated safety. Quick takedown—action removable in two units—no special tools required —double extractors.

SIGHT—Dovetail sight on receiver raises sighting line to provide fast, accurate shooting—especially advantageous when shooting rifled slugs for deer and other big game. Sight is removable and can be replaced, if desired, with any regular adjustable rear sight, since dovetail slot in receiver is of standard dimensions. Weight about 7½ lbs. Overall length 49 inches.

FOX STEVENS

Double Barrel Shotguns

With a Double Barrel Shotgun—and Only a Double!

You have the instant command of two fast shots—the split-second selection of two different chokes. And—a "double" is the world's traditional shotgun — never topped for dependability — performance — fine handling qualities.

NEW! with Ventilated Ribs

From butt plate to muzzle the Fox Models have the refinements that appeal to those who appreciate a truly fine "double." The stock is correctly designed for quick shooting and is made from selected walnut, fluted at the comb with an artistically checkered and capped pistol grip. The walnut fore-end is contoured to fit the hand and is checkered for firm grip. The box-type, blued-finish frame is attractively decorated, and its streamlined, rounded surfaces join the stock in a smooth, unbroken line. Proper weight distribution provides lightness and perfect balance so that it comes up quickly and gracefully enabling you to line up your game easily and surely. The dependable coil spring, hammer and sear mechanism is lightning fast, with clean, crisp trigger pull. Uniformed patterns are assured by precision bored and choked barrels.

We Do Not Reblue Double-Barrel Shotguns

GUN PARTS

We try to carry a complete stock of replacement parts for all modern firearms. This includes factory-made buttstocks, fore-ends, magazine tubes and clips, etc. If we are temporarily unable to fill your order, we will cancel same and advise you accordingly.

Please Note When Ordering Parts—Due to occasional engineering changes on component parts, some of which affect interchangeability, it is suggested that the original broken or worn part to be replaced be sent in with your order so that we can positively identify the desired part. When this cannot be done, the gun for which parts are required should be described fully, including model. barrel length and serial number. If model or calibre is not known, send pencil sketch. This will assist us in proper identification and make possible a prompt shipment of parts without further correspondence or delay.

ADDITIONAL GUN SERVICES

We can also rebuild or sporterize many types of firearms. For example:

Enfield P14 or 17. Remove Rear Sight Ears	$9.00

"Crown-Grade" Model 3000

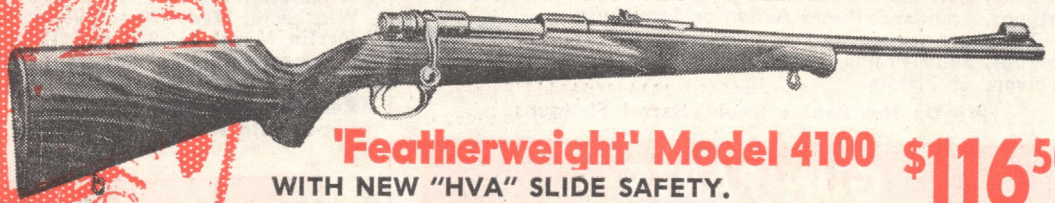
WITH NEW "HVA" SLIDE SAFETY. .30/06, .270, .308, .243 CALIBRES.

A masterpiece of accuracy and superbly crafted, made of Swedish steel, weight has been minimized without sacrifice of strength. Stock is selected European walnut in Monte Carlo design, with built-in cheek rest. Built on the HVA action with jewelled bolt and extractor. Average weight, 7¼ lbs. **IMPROVED MAUSER ACTION**—This famous action was designed for the "Crown-Grade" rifle.

SPECIFICATIONS: Barrel—Round, tapered. Length 23¾ inches. **Rifling**—Calibres .30/06 and .308, four lands and 12-inch twist. Calibre .270, four lands and 10-inch twist. **Magazine**—Standard 5-shot with hinged floor plate. **Safety** — HVA Slide Safety that locks both trigger bar and breech bolt. **Receiver**—Streamlined design, smaller size, light weight. Front receiver ring same diameter as rear ring. Drilled and tapped to accommodate popular scope mounts and receiver sights.

"Crown-Grade" Model 3100 $124.50

Same as above—except the butt stock is of sporting style with built-in check rest. Same calibres as Model 3000—**DELIVERED**..



'Featherweight' Model 4100 $116.50

WITH NEW "HVA" SLIDE SAFETY. .30/06, .270, .308, .243 CALIBRES .....

SPECIFICATIONS: Action—HVA Improved Mauser. **Barrel**—Round tapered barrel, 20½ inches long. Made of finest Swedish steel, Nitro-proof tested to rigid standards. Unsurpassed strength and long life with extremely high accuracy. **Rifling**—.270 calibre—four lands and grooves. 10-inch twist. .30/06 and .308 calibres, four lands and grooves, 12-inch twist. **Magazine**—Box-type with hinged floor plate. Five-cartridge capacity. **Safety**—HVA slide safety, locks both the trigger bar and breech bolt. **Sights**—Adjustable open rear sporting sight and hooded ramp front sight, with silver-plated bead. Receivers drilled and tapped for most receiver sights and scope mounts. **Stock**—Choice European walnut, polished and oil-finished. "Sporting"-type design with built-in cheek rest, hand-checkered pistol grip and foregrip. Slight off-cast for ease in rapid sighting. Snobble fore-tip. **Length**—Overall, 41½ inches. **Weight**—Approximately 6 lbs., 6 ounces.

"Featherweight" Model 4000 $124.50

.30/06, .270, .308, .243, and 7m/m—Same as above, except butt stock is of Monte Carlo design with built-in cheek rest.—**DEL.** ..

.270 STD	19B04
.30/06 STD	19B05

The most accurate, most powerful rifle in the world today. Unsurpassed in beauty, balance, handling qualities and workmanship.

SPECIFICATIONS: Stock: American black walnut, individually hand-bedded. Detachable sling swivels. Basket weave checkering. Monte Carlo style with cheek piece, designed for both scope and iron sights. **Barrel:** 24 inches. 12-inch twist (one turn of the rifling for each 12 inches of length). Six rifling grooves are used. All barrels are of a special alloy produced by the Timken Roller Bearing Co., making the barrel on a Weatherby Mark V the most accurate, stress free and stable of any barrel made today. **Weight:** Approximately 7¼ pounds, without sights.

SCHULTZ & LARSEN SPORTING RIFLE

MODEL 60

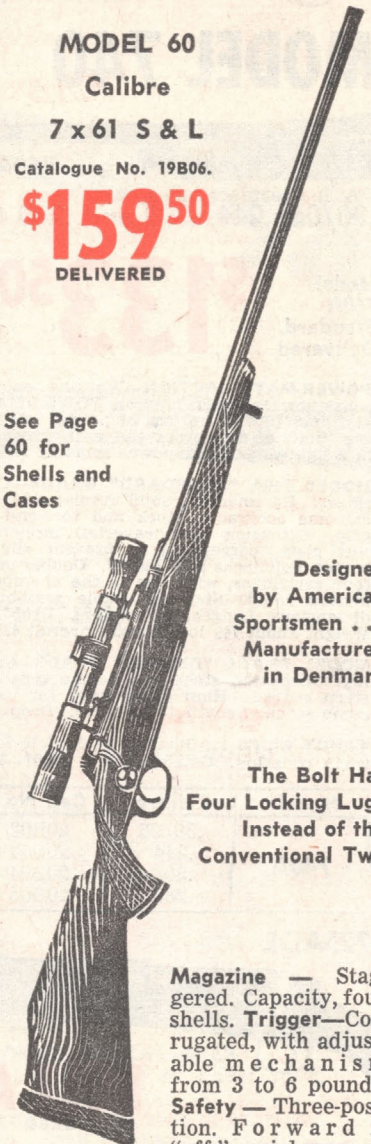
Calibre

7 x 61 S & L

Catalogue No. 19B06.

$159.50 DELIVERED

See Page 60 for Shells and Cases



Designed by American Sportsmen . . . Manufactured in Denmark

The Bolt Has Four Locking Lugs Instead of the Conventional Two

Magazine — Staggered. Capacity, four shells. **Trigger**—Corrugated, with adjustable mechanism from 3 to 6 pounds. **Safety** — Three-position. Forward is "off," midway is "on," locking the mechanism but the bolt may be opened or removed, and full rear is "on," locking bolt closed. **Trigger Guard** — Special forged. The hinged floorplate is released by a butt on in the front of the guard to prevent accidental opening. **Loading**—Can be fed from either top or bottom. **Feeding**—Receiver is lengthened slightly to permit better feeding and eliminate possible mutilation of softpoint bullets in speed firing. **Scope Mounting** — Lengthened action precludes use of one-piece mounts. However, double base types such as Weaver Buehler and Leupold-Detacho will fit the M60. **Hand Loading** — We carry Lyman and C-H reloading dies for this calibre.

The Mannlicher-Schoenauer sporting rifle or carbine unites in a most typical manner all the attributes of quality such as precision, durability and regularity. The Mannlicher-Schoenauer sporting rifle or carbine is a repeater, operated by bolt action having a two-way movement for opening (extracting and ejecting), unlocking and cocking of firing pin; locking being effected by means of cam surfaces arranged symmetrically behind bolt head, bolt handle being arranged and located at side of breech. A distinctive feature is drum-shaped rotary magazine which is absolutely dust proof. All models have swept back bolt handle and side safety for low telescope mounting.

MODEL "MC" RIFLE — 22-inch barrel; total length, 43½ inches; weight, 7¼ lbs. **Stock**—Walnut with checkered pistol-grip and fore-grip, with white spacers between Butt Plate, Pistol Grip Plate, Forend Tip and Stock.

MODEL "MC" CARBINE—20-inch barrel; total length, 41 inches; weight, 7 lbs. **Stock**—Walnut with checkered pistol-grip and fore-grip, with white spacers between Butt Plate, Pistol Grip, Plate and Stock.

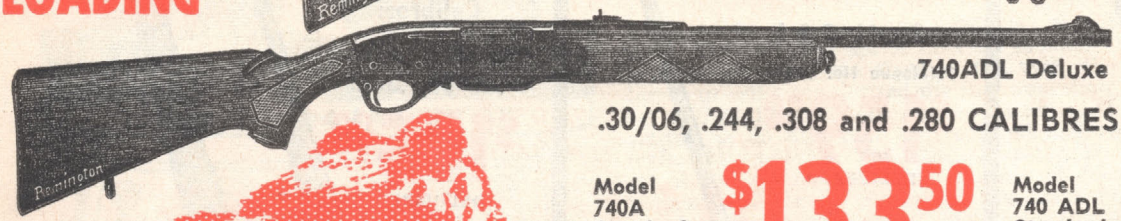
740A Standard

MODEL 740 "Woodsmaster"



740ADL Deluxe

5-Shot Capacity
4-Shot Clip Mag.

.30/06, .244, .308 and .280 CALIBRES

Model 740A Standard, Delivered.. **$133.50**

Model 740 ADL Standard, Delivered.. **$149.50**

Amazingly Accurate—Free-floating barrel, the ultimate in precision rifling, and advanced method of securing barrel to receiver, contribute to "Woodsmaster's" high degree of accuracy. **Remington Fire Control**—Gun will not fire if trigger is pressed while action is closing. Trigger must be released and pulled for each shot. Cannot be fired unless action is completely closed and securely locked . . . an important safety feature.

POWER-MATIC ACTION—Working on the same principle as a jet aeroplane, the sensational new Remington POWER-MATIC action balances and softens recoil . . . and does it with no loss of power! As the gas moves rearward to operate the action the "jet" effect forces the rifle forward. Result: The softest recoil ever achieved in a lightweight high-power sporting rifle!

MODEL 740A "STANDARD" GRADE—Chambered for .30/06, .244, .308 and .280 cartridges. Hammerless, solid frame, side ejection. 22-inch barrel, bored and rifled for extreme accuracy. Stock and fore-end of American walnut. Properly shaped pistol grip. Extension semi-beavertail fore-end with finger grooves. Shotgun style metal butt plate, corrugated to prevent slipping. Cross-bolt safety. Rotary multiple-lug breech bolt locks into barrel. Double action bars. Quickly detachable magazine holds four cartridges, with one in the chamber. White metal bead front sight mounted on matted ramp. Step adjustable semi-buckhorn sporting rear sight. Standard stock dimensions: Length, 13½ inches. Drop at comb, 1¾ inches. Drop at heel, 2¾ inches. Weight about 7½ lbs. Length overall 42¼ inches.

MODEL 740ADL "DELUXE" GRADE—Same specifications as above except the following: Checkered stock and deluxe type checkered fore-end; decorative grip cap; sling strap swivels. High comb stock for use with telescope sights. Dimensions for high comb stock: Length 13½ inches. Drop at comb, 1¼ inches. Drop at heel, 2 inches.

4-SHOT CLIPS for Remington Models 740A or 740ADL. State calibre of rifle when ordering. **Catalogue No. 20B01—Price, delivered, each** **$8.00**

SPECIFICATIONS—Calibres—.222 Remington, .244 Remington, .280 Remington, .30/06, .270 Winchester. **Capacity**—4 in magazine plus one in chamber, except .222 Remington has 5 in magazine plus one in chamber. **Barrel Length**—22-inch in .280 Remington, .30/06 and .270. 24-inch in .222 and .244. **Overall Length**—42½ ins. in .280, .30/06 and .270. 43½ ins. in .222 and .244. **Stock Dimensions**—13½ ins. length of pull, 2⅛ ins. drop at heel, 1¾ ins. drop at comb. **Receiver**—Drilled and tapped for scope mounts. Hinged floor plate, fixed box magazine. **Sights**—Flat faced gold bead with hooded ramp front sight. Step adjustable rear sight with windage and adjustment screw. **Weight**—7 lbs.

ALL-PURPOSE STOCK

Revolutionary new **all-purpose stock** means no more worry about interchanging between open and telescopic sights. No matter which is used, the eye is always in perfect sighting line. The pistol grip has been shaped to reduce the reach from hand to trigger . . . assuring more uniform squeezing of trigger. Straighter stock lines combined with slight forward slope of comb means less recoil.

Calibre	Cat. No.	Calibre	Cat. No.

Model 88 Lever Action

.308, .243, .358 Calibres,
Five-Shot Repeater ..... **$134.50** DEL.

HAMMERLESS—22" Barrel

SPECIFICATIONS: Type—Hammerless, lever action, with rotating bolt and side ejection — a five-shot repeater. **Stock** — One-piece American walnut, fitted with sling swivels. Hand-checkered pistol grip with nylon grip cap. Semi-beavertail, hand-checkered fore-end. Medium height comb with flute and non-slip nylon butt plate. Length of pull, 13½ inches. Drop at comb, 1⅝ inches. Drop at heel, 2½ inches. **Sights**—Winchester white metal bead front sight mounted on ramp with removable sight cover and Lyman folding middle leaf sight, adjustable for elevation. **Magazine**—Detachable box-type with positive front and rear-locking latches—capacity five cartridges. **Safety**—Winchester cross-bolt safety with red band warning mark, operated by oversized button in the forward section of the trigger guard. The interrupted trigger prevents firing while lever is being operated. If finger is held on the trigger, it must be released and trigger pulled again after lever is "closed." Additional safety device built into the lever mechanism locks the trigger if lever is not completely "closed" in firing position. **Weight**—Approximately 6½ lbs.

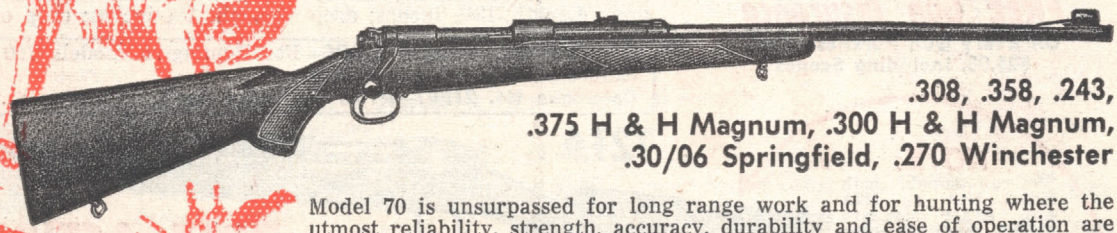
Model 70 Bolt Action

Seven Famous Calibres,
Five-Shot — 24-Inch Barrel ..... **$129.50** DEL.



**.308, .358, .243,
.375 H & H Magnum, .300 H & H Magnum,
.30/06 Springfield, .270 Winchester**

Model 70 is unsurpassed for long range work and for hunting where the utmost reliability, strength, accuracy, durability and ease of operation are required. It is furnished in the selection of calibres shown above suited for the largest or the smallest of all game and varmints. Its cartridges include a wide selection of the most popular loads. Barrel and receiver are of Winchester Proof-Steel—finest and hardest of gun steels. Stock and fore-end are of fine-grained American walnut expertly finished. Balance, supremely strong, flawless action and perfection of every detail to meet modern requirements make this without question the finest bolt action repeating rifle ever to bear the name of WINCHESTER.

SPECIFICATIONS: Barrel — Round, tapered Winchester proof-steel. Bored rifled, chambered and lap finished to highest Winchester standards. **Stock** — Sporting-type pistol grip stock of American walnut with full, well-shaper fore-end and nicely checkered. Approximate length of pull, 13½ inches; drop at comb, 1⅝ inches. Steel butt plate checkered. **Action**—Cocks on opening lift of bolt. Bolt instantly removable. Famous Winchester Speed Lock. **Safety**—Three-position safety enables you to be ready for a shot at any time. On safe, both firing pin and bolt are fully locked. Intermediate position locks firing pin but not bolt, permitting action to be worked. **Magazine**—Staggered box type with hinged floor plate for convenient access for emptying or cleaning. Holds five cartridges except in .300 H & H Magnum and .375 H & H Magnum. **Four Sights**—Bead front on forged ramp base with removable sight cover. Winchester sporting rear. Receiver drilled for several popular micrometer receiver sights and 'scope mounts. **Equipment**—One-inch swivel bows. **Weight**—about 8 lbs. in .30/06 Springfield. **Overall Length**—44½ inches. **Barrel Lengths**—.307, 22-inch; .30/06, .270, 24-inch; .375 Magnum, 25-inch; 300 H & H Magnum, 26-inch.

Priced at Only

$79.50 DEL.

Probably more deer have fallen to this World-Famous lever-action Winchester in the past 50 years than to all other rifles combined. Easy to carry and handle — utmost dependability — have made this rugged, fast-operating carbine a universal choice as an ideal timber rifle or saddle gun. Weighing only 6¼ lbs., Model 94 comes up in a flash. Its lever action is so smooth and fast that a movement of the finger lever withdraws breech bolt, ejects empty shell, cocks the hammer and throws a new cartridge into chamber. When closed, the action is securely locked by a block of steel which entirely covers the rear of breech bolt. Visible hammer has a safety notch at half cock One style only in .30-30 Winchester or .32 Winchester Special calibres.

SPECIFICATIONS: **Barrel**—20-inch tapered, of Winchester Proof-Steel. **Stock**—Straight grip stock and forearm of American walnut. Checkered steel butt plate. Approximate dimensions: Length of pull 13 inches, drop at comb, 2 inches; at heel 2⅝ inches. **Action**—Winchester lever action with visible hammer and safety notch at half cock. **Magazine**—Tubular type holding six cartridges. With one in chamber, Model 94 is a seven-shot repeater. **Sights**—Bead front on ramp with removable sight cover, Winchester sporting rear sight. **Overall Length**—37¾ inches.

DELIVERED

The Imperial Hi-Power rifle represents an advance in the technique of bolt action rifles. Each calibre rifle uses a custom-made action that is best suited for that particular cartridge. Thus less weight and superior performance may actually be combined in one hunting rifle. The B.S.A. receiver, B.S.A. bolt, B.S.A. trigger and B.S.A. magazine have many points of superiority.

B.S.A. Featherweight Specifications

BARREL—Made of Jessops chrome alloy steel. The barrels are machined from individually forged heat treated billets—for distortion-free unstressed steel—thus the control of vibrations at the time of firing are unhampered by material flaws. The grooves are individually cut one at a time for absolutely concentricity and accuracy. No other method can surpass this rifling system. It guarantees each barrel is perfectly produced. Barrel length 22 inches.
STOCK—The genuine French Walnut stock is hand-sanded and finished in genuine French polish. The checkering is flawlessly cut by master gun craftsmen. The richly designed pear-shaped fore-end flows into a handsome Monte Carlo cheekpiece on the butt, a necessity when using telescopic sights. The pistol grip is the best designed for any rifle, fits your hand like a glove. For final touch, white line interlays are used with the grip cap and butt plate.
MAGAZINE—The magazine is machined of solid stock and hand-polished for deluxe quality. Conveniently located in the trigger guard to facilitate cleaning is a quick release for the hinged magazine bottom plate. Flush fitted into the stock for deluxe streamlining. Improved cartridge control ribs in magazine box prevent the possibility of any feeding jams and protect soft nose bullets during recoil. Capacity four shells.
BOLT—In order to permit the lowest scope mounting possible a new low sweeping bolt handle adds beauty to the rifle. Silent safety prevents warning animals when stalking. This handsome side safety catch can be operated without moving the finger from the trigger for speed in the hunting field. Safety locks both bolt and firing pin. Red spot warning indicator.
TRIGGER—B.S.A. has the only adjustable trigger pull for either single or double pull—a very valuable feature making the rifle completely useful either in the hunting field or on the target range.
ACTION—Each B.S.A. action is designed specifically for the cartridge utilized and is of correct length. This increases your speed in the hunting field. Actually machined from one solid bar of English Jessop steel that has been heat treated and laboratory tested. Telescope dovetails as an integral part of the body permit the lowest, simple and strongest mounting yet achieved for hunting scope sights. New recoil stop is machined into the receiver for positive realignment of scope. The receiver is drilled and tapped for standard aperture receiver sights. Weight 6¼ lbs. Overall length 42½ inches.

LEFT-HAND MODEL — $119.50 DEL.

Monte Carlo .30/06, .270, .308, .243.
A True Left-Hand Rifle.

A completely new bolt-action rifle developed and manufactured entirely in America. Brilliant simplicity of design and precision engineering have produced a rifle that combines beautiful lines and perfect balance with rugged strength, velvet-smooth action and exceptional accuracy.

SPECIFICATIONS: Barrel—Tapered, medium weight, chrome-molybdenum steel, proof-tested. Full floating for utmost accuracy. Length, 22 ins. **Action**—Cocks on opening. Double front locking lugs for maximum strength. Recessed bolt head fully enclosed in receiver when firing. Receiver has twin gas ports for added safety. Indicator shows by sight or touch when action is cocked. Bolt easily removed and disassembled without tools. Top tang safety locks bolt, sear and trigger. Crisp trigger pull is readily adjusted by screw located directly in front of safety. **Magazine**—Staggered box type; built-in buffer protects bullet tips. Holds 4 cartridges; one in chamber makes 5 shots available. **Stock**—Gracefully contoured stock of selected walnut with checkered pistol grip and fore-end. Non-slip anodized aluminum butt plate. Capped pistol grip. Medium high fluted comb. Dimensions; trigger pull 13½ inches, drop at comb 1½ inches, at heel 2½ inches. **Sights**—Gold bead front sight on removable ramp. Semi-buckhorn rear sight has step elevator, folds flat for scope use, returns to same elevation setting. Receiver tapped for aperture sights and top-mounted scopes. Bolt design permits lowest scope mounting. **Weight**—About 6¾ pounds. Length overall, 43 inches.

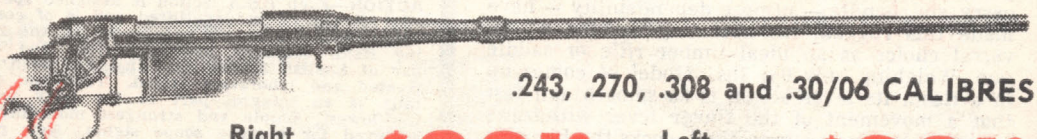
NEW! Savage 110 Barreled Actions



.243, .270, .308 and .30/06 CALIBRES

Right Hand Action, Delivered, **$88.50**

Left Hand Action, Delivered, **$99.50**

Since the introduction of the Savage Model 110, shooting enthusiasts have asked for a barreled action of this outstanding rifle so they could "custom make" the 110 to their own specifications. Model 110 barreled actions are identical with the regular 110 rifle except that the stock, front and rear sights and sight slots are omitted. It has the same unique features: Superb accuracy, top tang safety, adjustable trigger pull, cocking indicator, magazine design that protects bullet tips, twin gas ports, double front bolt locking logs, low scope mounting—all the attributes that have given the Savage 110 immediate acceptance by gun experts and sportsmen alike.

Jeweled breech bolt, case-hardened lever, blued receiver. Hammer indicator on top tang automatically shows cocked or fire position of hammer. Matted trigger. Finger-tip safety control on right side of trigger guard locks trigger and finger lever. **Magazine**—Rotary box type with indicator on left side of receiver showing number of cartridges in magazine. Capacity: 5 cartridges, with one cartridge in chamber making a six-shot repeater. **Sights**—Bead front sight on raised ramp base and adjustable semi-Buckhorn sporting rear sight. Receiver tang drilled and tapped for all standard aperture sights. **Weight**—About 7¼ pounds. **Length, Overall**—43¼ inches. **Stock and Fore-end**—Stock and fore-end of selected walnut, checkered, rubbed oil finish. Capped, full pistol grip. Stock dimensions: 13 inches long from trigger, 1⅞-inch drop at comb; 2⅝-inch drop at heel. Corrugated steel butt plate of shotgun design, 1½ x 4⅞ inches.

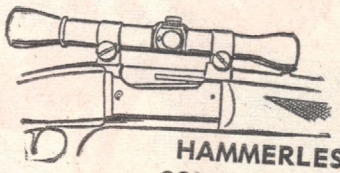
OUTSTANDING FEATURES of the FAMOUS SAVAGE 99

ROTARY MAGAZINE

"No one ever dropped a 99 magazine." Fully enclosed, precisely engineered. Smoothly rounded, solid metal parts cannot dent or distort cases or bullets. Balance is the same, regardless of number of rounds in magazine.

FIRE AS FAST AS YOU CAN AIM

Short swing of the finger lever is a natural motion. Rifle never leaves your shoulder — forefinger returns automatically to trigger. You can literally shoot the 99 as fast as you can take aim.



HAMMERLESS SOLID BREECH

Nothing interrupts the streamlining of the receiver. Action is fully enclosed; there's solid steel between you and possible trouble. Side ejection and lever action leave receiver free for low top-mounting of 'scope sight.

PERFECT BALANCE

Pick up the Model 99, its appearance of graceful, seemingly weightless balance is confirmed. As you bring the 99 to your shoulder you know why hunters find it quick and sure to point, comfortable to hold, easy to carry.

$46.50 DEL.

The two Model 77 rifles pictured here are uncontestably the best values today in a low-priced .22 automatic rifle. With the best of materials and workmanship going into their making, both Model 77 rifles are rugged and dependable. Accuracy is fully up to Winchester standards. Their graceful lines, fine handling qualities and handsome appearance are unequalled. Rifle, with detachable box magazine, has 8-shot capacity. Rifle, with tubular magazine, has capacity of 15 shots. Uses all types of .22 Long Rifle cartridges, except low-velocity Match ammunition.

SPECIFICATIONS: Barrel—22 inches, round, tapered, crowned at muzzle. **Stock**—Sporting-type pistol grip stock of genuine American walnut. Semi-beavertail fore-end. Checkered composition butt plate. Approximate length of pull, 13½ inches; drop at comb, 1½ inches; drop at heel, 2½ inches. **Action**—Semi-automatic (self-loading). First cartridge is manually loaded by pulling back and sharply releasing operating knob on left side. Rifle will then fire as fast as the trigger can be pulled. **Receiver**—Totally enclosed except for the small ejection port on right side, and grooved on top to permit easy attachment of 'scope mounts. **Calibre**—.22 Long Rifle—designed for all .22 Long Rifle cartridges. **Magazine**—Tubular magazine holds fifteen .22 Long Rifle cartridges. **Safety**—Positive safety is provided by a positive side lever safety on the right side of the receiver, which directly blocks the trigger when in the "safe" position. **Sights**—Winchester No. 75 bead front and No. 32B sporting rear sight. Receiver grooved for Weaver "Tip-Off" Mount. **Weight**—About 5½ lbs. **Over-all Length**—40¼ inches.

WINCHESTER Slide Action Repeater

DELIVERED $68.50

HAMMERLESS • 24-INCH BARREL • DOVETAILED FOR WEAVER TIP-OFF MOUNT

The Model 61—an all around hammerless slide action .22 repeater — presents a fast, finely balanced arm that combines Winchester gun design with their famed selection of high quality materials and precision workmanship. This takedown model presents the most modern development of the popular closed-in breech type rifle. Tapered 24-in. Winchester barrel. American walnut stock with well shaped pistol grip. Bead front and quick elevating sporting rear sight. Long semi-beavertail slide handle to give a satisfactory grip because of its broad undersurface. Closed in breech hammerless slide action simple in structure, surprisingly fast in action, sure in functioning. Hammer cannot fall when gun is not breeched. Cannot be jammed with a cartridge by partial movement of the action. Slide action lock is in safe and convenient position. Trigger locks directly into nose of sear. Tubular type magazine holds 20 Short, 16 Long or 14 Long Rifle .22 cartridges interchangeable.

WINCHESTER Automatic Single Shot

DELIVERED..... $28.50

TOP LOADING . . . WEIGHS ONLY 5 LBS. . . . 21-INCH BARREL

Incorporating a revolutionary idea in functioning operation, the Model 55 is the first top-loading, single shot, **automatic** .22 rifle ever to be offered to Canadian shooters. Once the rifle is cocked and loaded—which causes the safety to go **"On"**—ejection and recocking are automatic after the first shot. All you have to do is reload, release the convenient tang safety and you're ready for a fast second shot in no time at all. Because of its inherent safety factors, perfect balance and light weight, the Model 55 is an ideal "first" rifle for boys and girls of all ages.

Very Simple Operation—Push safety forward to "Off" position exposing red dot. Cock rifle by pulling back slide handle and releasing. Rifle cannot be cocked with the safety on. Load rifle by placing cartridge on loading chute, push cartridge down and forward, seating cartridge in chamber. Safety automatic moves to "Safe" position. To fire rifle, push safety to "Off" position exposing red dot and squeeze trigger. For second shot, reload as before, release safety and fire.

Model 67

Catalogue No. 29B05

WINCHESTER Bolt Action Single Shot

MODEL 552 'SPEED MASTER'

Autoloading Rifle

Catalogue No. 34B01—DELIVERED **$52.50**

NO OTHER AUTOLOADING .22 RIFLE OFFERS THESE FEATURES:

- **Exclusive Remington streamline design . . . the only .22 autoloading rifle with "companion," big game rifle and shotgun similar in appearance, handling qualities and operation.**
- **Trouble-free, self-cleaning action will give years of lasting, dependable service.**
- **Exclusive single loading with auto-ejection.**
- **Shoots .22 Short, Long and Long Rifle cartridges without adjustment.**

The first and only .22 calibre autoloading rifle with exclusive single loading, auto-ejection feature. 23-inch, round, tapered barrel crowned at muzzle. Genuine American walnut one-piece sporting stock. Semi-beavertail fore-end. Half pistol grip stock with black composition butt plate, checkered to prevent slipping. The famous Remington cross bolt safety. Step-adjustable rear sight. Concealed dovetail slot for other rear sights, if desired. White metal bead front sight mounts. Fired shell deflector. Receiver grooved for "tip-off" mounts. Magazine capacity: 20 Short, 17 Long and 15 Long Rifle cartridges. Length overall, 42 inches. Weight, about 5½ lbs.

MODEL 550 AUTOLOADING

Exclusive Power Piston

Catalogue No. 34B02—DELIVERED **$46.75**

If you want an all-around .22 rifle that is ideally suited for small game and varmint hunting, target practice, gallery shooting or just plain plinking, choose the new Remington Model 550. Here is a man-sized .22 autoloader that is lightning fast, accurate, sturdily built, and dependable. Since it handles all three sizes—Short, Long, Long Rifle cartridges—it is "three guns in one" yet it is one of the most moderately priced autoloading rifle on the market.

SPECIFICATIONS—Autoloading, takedown, shoots .22 Short, .22 Long and .22 Long Rifle regular or Hi-Speed cartridges interchaneably and automatically without adjustment, 24-inch round, tapered barrel, crowned at the muzzle. Full size, one-piece pistol grip stock of genuine American walnut. Long, full, well-rounded fore-end of semi-beavertail type. Bakelite butt plate. Large magazine capacity holding 22 Short, 17 Long or 15 Long Rifle cartridges. Top of receiver grooved for quicker sighting. Single extractor. Positive side lever type thumb safety. New style step adjustable rear sight and white metal bead front sight for quick aim. Base of rear sight conceals dovetail slot to permit fitting of other rear sights. Length over-all 43½ inches. Takedown 31½ inches. Weight about 6¼ lbs.

MARLIN'S NEW! .22 CAL. LEVERMATICS

The 56-Levermatic requires less than a 25-degree stroke to open breech, eject shell and close breech on a new cartridge. This short, smooth action is achieved by use of a radically new cam and roller accelerator mechanism, on which patent is pending. The 56-Levermatic can be worked through a cycle without removing hand from pistol grip with speed substantially equal to an auto-loading rifle. This is the first lever action offered having the rigidity of attachment of action to stock usually found in high-power bolt action rifles. Action is securely embedded in a one-piece stock,

COLTEER 1
Single Shot

Cat. No. 41B01
$26.75

Less Scope

Shoots Shorts, Longs or Long Rifle Shells

A Rugged, Accurate, Dependable Rifle for the Small Bore Shooter

The Colteer 1-22 is a superior quality, single-shot .22 calibre rifle which incorporates many custom features at a very reasonable price. Used with .22 short cartridges, the Colteer 1-22 provides good plinking and target practice at a nominal cost. With Long or Long Rifle cartridge its inherent accuracy makes it an excellent small game piece.

LOOK AT THESE CUSTOM-RIFLE FEATURES:

1.—You can 'scope the Colteer.
2.—It has a non-glare band ramp front sight and a rear sight fully adjustable for windage and elevation.
3.—A foolproof, specially designed loading ramp prevents jamming.
4.—A self-cocking bolt prevents accidental firing — gun will not fire unless bolt is fully locked.
5.—Rotary-type thumb safety gives further accidental-fire protection.
6.—Round, tapered and crowned barrel is made of finest quality steel—and has 6-groove, button rifling for high accuracy.
7.—Genuine black walnut stock has Monte Carlo comb, full pistol grip, and rugged composition butt-plate.

SPECIFICATIONS

Ammunition—.22 Short, Long, Long Rifle. **Barrel Length**—24 inches. **Overall Length**—41¾ inches. **Weight**—5½ lbs. **Sights**—Band ramp front, adjustable rear receiver adapted for 'scope mounting.

For Use With .22 Long Rifle Shells

No firing pin—no extractor—sturdy recoil spring breech block made of heat-treated special steel, "Mauser-type" six-groove rifling of high precision, one turn in 450 m/m (approx. 17½ ins.). Easy dismantling and reassembling by hand without any tools.

WORKING PRINCIPLE — When you press the trigger, the breech block is thrown forward, under pressure of the main spring. (The trigger pull can be regulated). In its travel, it feeds a cartridge from the magazine, introduces it into the chamber of the barrel, and fires it. Under the force of the explosion gases, the breech block is thrown back to its original position and the cartridge case is ejected. The breech block is retained in the rear position, the recoil spring remains compressed, and the weapon is ready for further firing. This rifle is without a firing pin and the percussion is effected by means of a ridge across the face of the breech bolt directly across the base of the cartridge, which is crushed at two opposite points. This double percussion produces a simultaneous double ignition. It improves the power of the explosion gases, and gives maximum regularity and power to the ammunition.

MAIN FEATURES: Barrel—21½-inch tapered barrel with crowned reinforced muzzle and reinforced around the chamber to prevent vibration. Made of high tensile steel to ensure maximum hardness of the rifling. The barrel action assembly has been designed for best presentation. **Tangent, Large Surfaced, Sliding Rearsight**—No side play. Windage and elevation. Graduated from 25 to 100 yards. Its base is hand fitted on to the barrel (to increase accuracy) and is maintained with a set screw to facilitate assembly. **Tunnel Foresight with Five Interchangeable Elements**—One cross-wire, one bead, one peep, one half-disc, one blade. Hand-fitted on to the barrel, as the rearsight. Spare foresight elements in the trap of the pistol grip. **Reversible Spring Guide**—With end masses of different weight to increase or decrease the inertia of the breech block depending upon the ammunition used (rimmed rear-end mass for standard type ammunition, fore-end mass for high velocity ammunition. **Position of the Bolt**—The rifle can be carried about either with an open or closed bolt. 1. To close the bolt pull out first the box magazine slightly. 2. Close the bolt. 3. Push the magazine fully in. No cartridge has thus been introduced into the chamber. For the first shot—when firing—simply pull the cocking handle towards you and the breech block will be set in position for firing. Alternatively, the breech can remain open for immediate firing with the box magazine fully introduced. **To Adjust Trigger Pull**—Remove the stock. Insert screwdriver in the hole at the rear of the trigger mechanism. Turn regulating screw clockwise to increase pull, and anti-clockwise to lighten. Overall length, 41 inches. Weight approx. 6 lbs.

MODEL A7 — Same description and specifications as Model A3 except with open sporting sights of exceptionally good quality.

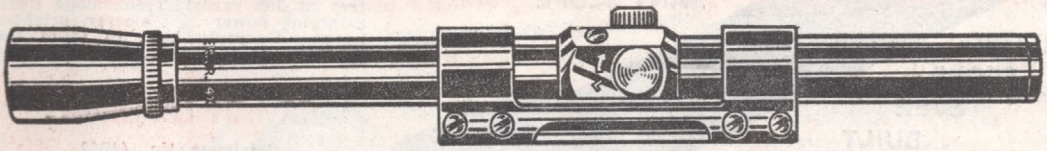
Coltmaster Junior Small Bore RIFLE SCOPE



Designed primarily for use on the Colteer 1-22, these fine scopes will mount on any .22 calibre rifle with dovetail cut on top of receiver. Quick, positive adjustment for elevation and windage, plus rugged construction and real beauty make these scopes a superior value. They will add immeasurably to the pleasure of shooting. Lenses are carefully ground and polished to give the very finest definition. Lightweight, weather-resistant alloys with super-smooth finish form a scope tube that can take real use in the field.

PRICED WITH MOUNTS

The four power Model B4 and six power B6 scopes were developed especially for .22 rim fire rifles, Hornets, Bees and similar calibres. The design, mechanically and optically, is a modern development and superior to any formerly used in .22 scopes. The B Models are light, compact with excellent optical qualities.

Optical System—The optical systems have seven lens elements and are achromatic, a feature not found in other scopes of this type. This lens system gives more light, sharper definition, clearer colors, and larger field of view than lens systems formerly used. Model B Scopes are limited to use on light recoil rifles because they are used at a relatively short distance, about two inches from the eye and not because of any lack of strength.

Adjustments—Windage and elevation adjustments, of guaranteed accuracy, are internal and fully protected. The B Models have friction lock adjustments that are graduated and can be set with coin or cartridge rim. Windage and elevation movements are entirely independent and designed to give positive and exact sight changes with no play or lost motion. The B4 windage and elevation adjustments give a 1-inch sight change per graduation at 100 yards, and the B6 graduations ½-inch at 100 yards.

Accuracy—Sturdy, compact construction makes the Model B a real hunting scope. The B4 has enough magnification for nearly all shooting but not too much for easy use offhand. It will make your shooting a lot more fun and a lot more effective whether it is just ordinary plinking or serious work at crows, hawks, squirrels, woodchucks, or jack rabbits. The B6 is somewhat of a specialized scope for use where most of the shots are at long range, from a rest or prone position.

Weatherby IMPERIAL

The Greatest Scope Improvement

For hunting, you want a 2¾X or 4X scope. For target and varmint-shooting choose a 6X. For the first time, a scope has been designed by a famous big-game hunter and bench-rest shooter, who knows from experience exactly what shooters want most in a scope. The result is the Weatherby Imperial. Reliable, rugged, moisture-proof and fog-proof, the Weatherby Imperial actually makes sighting easier and faster than with iron sights, because of the large diameter of the exit pupil and the unusually wide field of view. Windage and elevation adjustments are combined in one dual dial on top of the scope. Also within finger-tip reach is the new focusing adjustment which works just like on your binoculars. The optical perfection of the Weatherby Imperial gives you unmatched luminosity or light-gathering power (brighter, clearer image with the highest contrast). This greater brightness lets you pick out small objects far away, even under poor light, for extra shooting at dawn and twilight.

2¾X—90 Luminosity

Catalogue No. 44B01
CROSS HAIR RETICLE

Widest field of view of any scope—47½ feet at 100 yards! Tremendous light-gathering power . . . clearer, brighter image. Ruggedly built to stand the heaviest recoil and roughest handling.

4X—81 Luminosity

Catalogue No. 44B02
CROSS HAIR RETICLE

Unmatched resolving power. Brighter, clearer image, even in bad weather. Coated lens for top contrast. 33-foot field of view at 100 yards. If you hunt antelope, sheep, moose, even woodchuck, this scope is for you.

6x—62 Luminosity

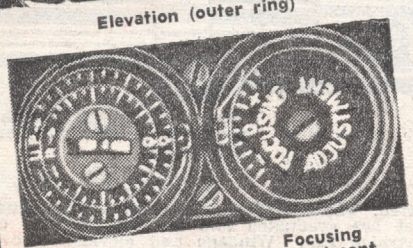
Catalogue No. 44B03
CROSS HAIR RETICLE

Extreme light-gathering power . . . 21 ft. 7 in. crystal-clear at 100 yards! Shockproof. Featherweight. Where game must be taken at long range, this scope makes identification and sighting more accurate, and hitting your tarket easier.

OTHER TYPES OF RETICLES

Above Scopes With Post—No Charge
Above Scopes With Dot—Add $12.00

Dual-Dial Feature



Windage (inner ring) — Focusing Adjustment

The most advanced sighting feature in the scope world today! To make windage adjustment, use any small coin. Turn inner ring as fine as ⅛ inch on 1-inch dial calibrations. To adjust for elevation, just turn outer ring in ¼-inch clicks on 1-inch dial calibrations. Focusing is right on top. It works just like the elevation adjustment, with markings as on your binoculars. And once you set it, it stays that way.

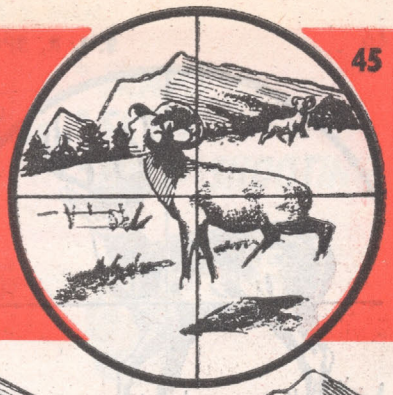
WHEN YOU PURCHASE SCOPE AND MOUNT FROM US

All Scopes Installed FREE!

EXCEPT WEAVER MODELS J2.5, B4 or B6.

Yes—Another S.I.R. SPORTING GOODS SERVICE. Your purchase of a Telescope Rifle Sight and Mount ENTITLES you to FREE installation by our own expert gunsmith, whether your rifle has been purchased from us or not. If your .22 calibre rifle will take the new Weaver Tip-off Mount there will be no charge for installation.

the WORLD'S FINEST SCOPES IN THIRTY YEARS — WITH DUAL DIAL



Variable Scopes

$98.50 DEL.

We recently brought to the public a 2-3/4X, a 4X and a 6X scope unparalleled in quality and absolute perfection. Later we introduced the 2-3/4X to 10X Variable scope that proved exceedingly popular. In fact, we have not been able to nearly meet the demand. Now we are introducing this new 2X to 7X Variable—the same in size as our popular 4X scope. This has all the rigid specifications as the rest of our Imperial scope line—air tight, dust-proof, fog-proof, and with an unconditional lifetime guarantee, the same patented focusing and reticle adjustments and the same clear optics.

WEATHERBY IMPERIAL

Catalogue No. 45B02

2¾X to 10X Variable

In addition to our popular 2¾X, 4X and 6X Weatherby Imperial scopes, we now offer you a new revolutionary 2¾X to 10X Variable—the only one ever produced giving you the full range from a 2¾ to 10-power scope. The scope has the same ocular and objective diameter as that of our 6X Imperial. The changing of power is accomplished by merely turning the ocular piece to the desired magnification. No screws or nuts or knurled rings to be loosened—just merely an easy smooth turn of the ocular piece. The windage and elevation are under the front dust cap, with the binocular type focusing located under the rear dust cap—the same as on all other Imperial scopes. It is recommended that in focusing your Variable scope you turn the ocular ring to the 10-power to obtain your correct individual focus for all powers.

This is without any question the finest Variable scope ever produced at any price, any place in the world today. The scope is of the same airtight, dust-proof one-piece construction with the exception of the ocular piece. But even though this is separate, due to the precise manufacturing tolerances, this is also air-tight and moisture-proof. The Imperial Variable is the scope for the man who wishes to have the finest scope, giving greater field of view and extreme luminosity or light gathering ability for hunting purposes, as well as for varmint and target shooting, using the 10-power setting. With this new Variable scope you are equipped for all types of shooting—from close range brush shooting to long range target work, by a simple twist of the ocular piece.

Magnification: 2¾X to 10X. Field of View at 100 Yards: 2¾X. 37'; 3X, 35'6"; 4X, 29'6"; 6X, 22'6"; 8X, 17'; 10X, 14'6". Clear Aperture of Objective Lens: 47.3m/m. Diameter of Exit Pupil: 2¾X, 17m/m; 10X, 4.7 m/m. Relative Brightness: 2¾X, 150; 10X, 22. Eye Relief: 2¾X, 4½"; 10X, 3½". Overall Length: 12½". Diameter of Tube: 1". O.D. of Objective End: 2.047". O.D. of Ocular End: 1.398". Weight: 14⅛ ozs. Elevation and Windage Graduation: ¼" clicks; 1" calibration marks.

Advanced Designs and Precision Manufactured

Years of scope making experience have gone into the development of the model J2.5. Optically, mechanically, and in dependability, they surpass many scopes costing twice as much. Careful design, improved lens making methods, and precision production in quantity are the secrets of such high quality at moderate price.

Model K WEAVER Scopes

HAVE FIXED RETICLES WITH INTERNAL ADJUSTMENTS

Reticle always centred—no more off-centre reticles! No adjustable mounts needed. Can be mounted with any rigid or pivot type mount. The scope can be adjusted to take care of mounting hole misalignments, out-of-line barrels, excessive windage and elevation adjustments, and reticle is still centred. A new development—and only in Model K Scopes. Plus These New Features: A new optical system—better than ever. New method of sealing —ALL threaded joints now sealed with Neoprene O Rings—a positive compression seal. *Except Model KV.

Satisfaction Guaranteed OR Money Refunded

FEATURES OF MODEL K

- Wide field of view, with brilliant illumination and needlesharp definition clear to the edge of the field.
- Fast but still give hairsplitting accuracy impossible with metallic sights.
- Can be used in rain or snow much more accurately and as dependably as ordinary sights.
- Special hard coating on the lenses increases light transmission 30%.
- No front sight or rear sight, just the crosshairs to be aligned on the target.
- The eye can be moved sideways as much as a half inch (impossible with metallic sights) and aim will still be accurate, an aid to lightning fast sighting.

Your greatest scope and mount buy

4 POWER The choice of most hunters today. Gives the best power for all-round hunting. Of course with a Lyman scope it's a full 4 power. Positive ½-minute adjustments.

2½ POWER The favorite of hunters who want the wider field of view needed for snap shooting at moving game, or where most shots are made at short range in woods or brush. Precise one-minute adjustments.

3 POWER An in-between combination of balanced power and field of view designed for medium-range hunting. ⅝-minute adjustments.

6 POWER Ideal for long-range hunting or varmint shooting. With the sharp image you see through your All-American, even the tough shots seem easy. Each click of adjustment represents ⅓-inch at 100 yards.

8 or 10 POWER Designed for fine varmint and extreme range big-game hunting. Fully adjustable at ranges from 50 yards to infinity. Positive .3 inch windage and elevation adjustments.

ALL LYMAN SCOPES available with crosshair or dot reticle at no extra charge. Please specify reticle required.

Cross-Hair Reticle: Covers ⅓ inch at 100 yards. Windage Adjustment: +—35 ft. of arc. Elevation Adjustment: —+40 ft. of arc, —10 ft. of arc (1 ft. of arc approx. 1 inch at 100 yards) Weight: 12 ozs. Overall Length: 12 inches. Diameter of Tube: 1 inch. Eyepiece Diameter: $1\frac{11}{32}$ ins. Objective Diameter: $1\frac{15}{16}$ ins.

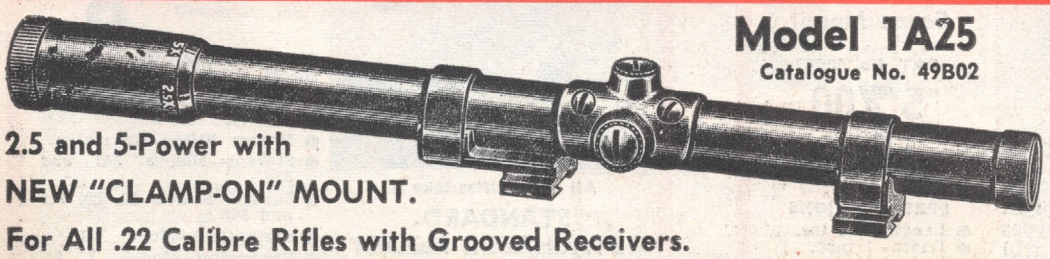
Your BALvar 8 is an important investment in lifetime satisfaction and service. Here are a few of the major advantages offered you: **Crisp, Clean Image**—You get razor-sharp definition and brilliant contrast of image, important when sighting game with protective coloration in the brush. **Retains Zero**—There's nothing delicate about the sight, mount or adjustment. It's just about as easy to bend the barrel of your rifle as it is to knock the sight out of adjustment. A jolt or blow would have to be severe enough to dent the hardened barrel of the scope to get it out of zero. **Most Dependable Sight Ever Built**—Windage and elevation adjustments are made in the mount instead of the scope. No tiny parts or delicate mechanisms to jar loose. And the reticle is always in the exact centre of the optical field. Permanence of lens mounting is assured by factory test in which scope easily withstands a shock of 800G's. **Guaranteed Fog-Proof**—Rain, sudden temperature changes, even immersion in a pail of water will not penetrate the guaranteed seal. **Variable Power**—By a partial turn of the knurled ring, you vary the power from 2½ to 8X. Scope stays in same focus, zeroed all the way, with no change in eye-point.

Check These 7 Features!

1—Dial the power you want for big game or varmints—continuously variable power from 2½X to 8X.
2—Shoot in all kinds of weather—it's guaranteed fog-proof!
3—Positive aiming accuracy—no target "blotout" even at highest power—cross-hairs remain **constant in size!**
4—Reduce fatigue—lightweight—only 12 ounces.
5—Shoot when **You** are ready—it's always zeroed.
6—Sight game instantly—running shots are easy . . . sharp edge to edge definition—B. & L. optics are world's best.
7—Enjoy lifelong trouble-free use—true B. & L. ruggedness takes any abuse.

A SPECIAL ADJUSTABLE MOUNT MUST BE USED WITH THE "BALVAR" SCOPE SIGHT

NEW *C-LECT* POWER SCOPE by Mossberg



Model 1A25
Catalogue No. 49B02

$32.25

DELIVERED

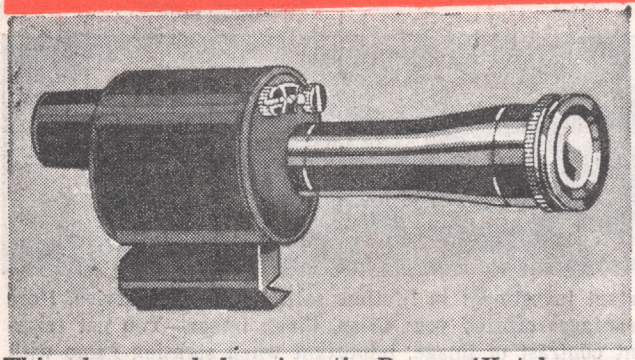
2.5 and 5-Power with NEW "CLAMP-ON" MOUNT.

For All .22 Calibre Rifles with Grooved Receivers.

A high quality yet low cost, new scope ideal for hunting and target shooting. Gives both 2.5X and 5X magnification. Change of power is made instantly by twisting revolving sleeve at rear of tube. All lens surfaces are hard coated to increase light transmission up to 40%. Easy, quick mounting—just **clamp it on** and tighten screws. Mount holds tube snug and low on receiver. Can be removed readily without disturbing zero setting of scope. **INTERNAL ADJUSTMENTS:** The patented internal adjustment feature permits adjustments to be made on cross hair reticle **inside** scope by means of **external,** coin-operated click screws. Two-inch eye relief. Field of view at 100 yards is 25 feet at 5X; 36 feet at 2.5X Weighs only 8 ozs. with mounts.

DEPENDABLE BOONE SCOPES

The flexible eye position, short length and bright image of both the Boone 4 and Boone 2¼ are made possible by a unique optical system which includes four mirrors to erect the image instead of the usual four erecting lenses, giving great brilliance of image because a minimum of light is lost passing through the system. Objective lenses are precision ground and polished from highest quality optical glass. Eye lenses are three-element Hastings type, noted for flat field and excellent definition. All lenses are hard coated. Mechanically, the Boone scopes include these features: Die cast magnesium alloy main body for greater strength and hardness, lens cells precision machined from aluminum alloy bar stock, all screws specially made from alloy steels and case hardened.



4 POWER SCOPE

- Eye Relief—3 ins.
- Paralax—Zero.
- Length—4¾ ins.
- Weight—4 ozs.
- Adjustments—Internal for windage and elevation by clicks.
- Field—28 ft. at 100 yds.
- Reticle—Standard cross-hair.
- **DOT** reticle, $10.00 additional

Catalogue No. 50B01

$50.00

DELIVERED

This close-coupled, prismatic Boone 4X telescope will fit in your pocket, yet can be slipped on the mount in seconds and zeros in every time. It is deadly accurate and is the hunting scope where 4-power magnification is needed on long shots or for varmint shooting. The Boone 4X eyepiece tube comes back to perfect eye position and the image is brilliant and sharp. 28-foot field at 100 yards. Eye relief 3 inches. Top mounts on top ejection rifles. With the Boone Scope the iron sights are instantly available in emergencies. Also the Boone Receiver Sight is available, which is interchangeable on the same mount. With this most efficient combination of sights you have your choice of scope, receiver sight or iron sights — instantly available.

2¼ POWER

Unexcelled for hunting fast-moving game, because it stays on target! Due to its amazingly flexible eye position, the Boone does not black out like other scopes. It slips on and off mount in seconds, zeroes in every time, gives a brilliant sharp image even on darkest days, can be carried in side pocket when not in use.

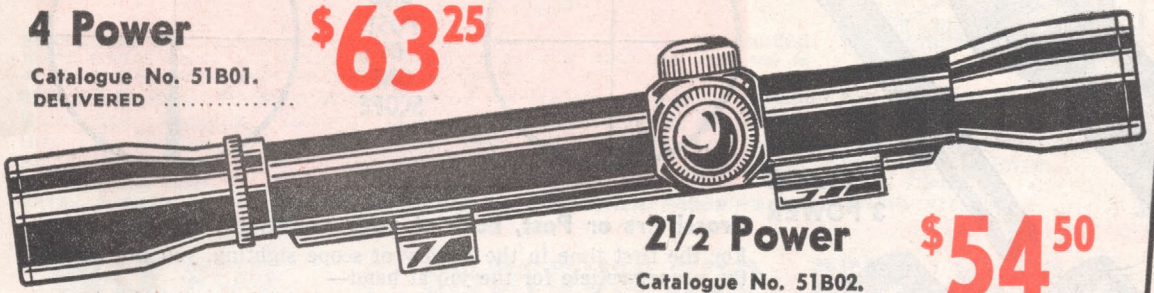
4 Power $63.25

Catalogue No. 51B01.
DELIVERED .....



2½ Power $54.50

Catalogue No. 51B02.
DELIVERED .....

Coltmaster scopes are designed for the Colt "57." They will mount quickly and easily, however, on practically any big game rife with a drilled and tapped receiver. Scope tubes and mounts (except for mounting screws) are made entirely of non-ferrous corrosion-resistant metals. Completely weather-proof and non-fogging. Coltmaster scopes give a wide field of view and excellent definition. Relative brightness is in excess of 25. Lenses are hard coated to eliminate reflection of light within the scope itself. Extremely accurate internal adjustments for elevation and windage may easily be made right on the firing line or in the field. All Coltmaster and Coltmaster Junior Scope Sights feature the popular cross hair sight reticle.

SPECIFICATIONS:

	2½X	4X

BINOCULAR "KNOW HOW"

WHICH BINOCULAR SHOULD YOU BUY

8 x 30 binoculars are considered by many as the all-around binocular for universal use. These are considered standard size. 7 x 35 and 8 x 40 give you a combination of more power and larger front lens. Desirable features long wanted. 7 x 50, 10 x 50, 12 x 50, 16 x 50 are "conquerors" of distance. Here you have high power and large sharp front lens that as a team, reach out and bring the image right up to you.

FIELD OF VIEW

Is what you see through your binocular from right to left or left to right at a given distance. All "Kurt Muller" "field of view" specifications are given at the recognized standard of 1,000 yards. Therefore, our listing of field of 373 feet means that at 1,000 yards the width of your vision is what you would be able to see at 373 feet.

COATING BINOCULARS

Because there have been so many exaggerated claims of superiority for Coating Binoculars that have been deliberately misquoted, to confuse the buyer, and are not fair to the buying public, **S.I.R. Sporting Goods** wish to point out these important facts: (1) What Coating is. (2) The value of Coating: Coating is an application of a transparent surfacing of magnesium fluoride. Coating simply reduces internal light reflections which cause annoying "Flares" and ghost images. Coating assures you satisfaction and increased binocular enjoyment as well as binocular efficiency. "Kurt Muller" binoculars feature special construction strength, also specially threaded lenses and reflectors to guarantee you continued perfect focusing under roughest use.

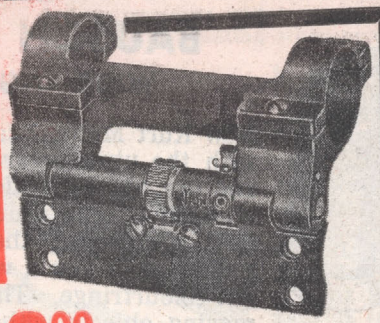
PACHMAYR LO-SWING MOUNT



SPECIAL LOW PRICE **$18.00**
Catalogue No. 56B01—Delivered

Extra, Base Only ... **$9.00**
Cat. No. 56B02—Delivered

NO OTHER SCOPE MOUNT HAS SO MANY ADVANTAGES

Swings to Side Instantly For Use of Iron Sights.

Guaranteed to Hold Zero. Mounts Low on Receiver.

Here is the famous Pachmayr Lo-Swing mount that is such a favorite with hunters everywhere! The only mount that permits instant use of iron sights when a scope is fogged or damaged, or when dangerous game charges.

CHECK THESE IMPORTANT POINTS

1. Mounts low on the receiver.
2. Swings to side instantly for use of iron sights.
3. Holds zero settings . . . swings on hardened precision male and female cones. Pivot points are parallel to bore of gun, maintaining accurate alignment.
4. Permits top clip loading.
5. In less than 30 seconds entire upper mount with scope can be removed . . . one scope may serve several rifles.
6. Unconditionally guaranteed to your entire satisfaction.
7. Fits all high power rifles, both domestic and foreign. Specify rifle action and scope model when ordering.

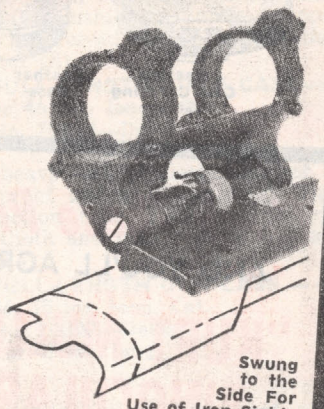
SWINGS ON CENTRE
No matter how many times the Lo-Swing Mount is swung aside or removed, it must always return to ZERO CENTRE because it is mechanically impossible to do otherwise.



Swung to the Side For Use of Iron Sights

Built-in latch holds scope in rigid firing position, but allows you to instantly swing scope out of the way when you want to use iron sights or clip load. A simple turn of the knurled finger nut detaches scope. **Perfect Alignment:** Like a lathe—it can only swing true. Regardless of how often scope is swung to side, or removed, your "Top" Lo-Swing Scope Mount always swings back to absolute zero.

NOTE: "Top" Lo-Swing bases and loops not interchangeable with Regular Lo-Swing Mount. Split ring model available for 7/8-in., 1-in. and 26 m/m Scope Tubes and all popular rifles.

LEUPOLD ADJUSTO-MOUNTS

One-Piece Adjusto-Mount

AND MOUNT PURCHASED FROM US

WEAVER SCOPE MOUNTS and LENS CAPS

The Side Detachable Mount is specifically made for those rifles having top ejection or when there is no room on the top of the receiver to take the Top Mount Base.

Both Weaver Top and Side detachable mounts are on entirely new principle. An accurate V locating surface with an angular welding surface that binds the V's of the base and the upper into a solid rigid unit. V locating surfaces are the most accurate known and assure perfect precision in retaining the scope to the rifle. Each clamp ring has two hardened screws. Experience has shown that two are needed to hold a scope immovable under recoil and rough use. Off and on in a second. Extra bases available for use of same scope on several rifles.

K. or J. DETACHABLE MOUNTS

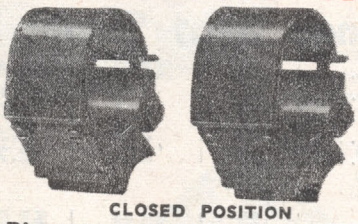
Either mount complete with 1 or ¾-inch rings and bases. State make, model and calibre of gun when ordering.

TOP SPLIT RINGS. Cat. No. 57B01.
SIDE SPLIT RINGS. Cat. No. 57B02. DELIVERED **$11.50**

EXTRA BASES—Cat. No. 57B03. DELIVERED **$1.50**

TOP DETACHABLE RINGS ONLY—Cat. No. 57B12. Del., **$10.50**

Weaver's *New* Pivot Mount



CLOSED POSITION

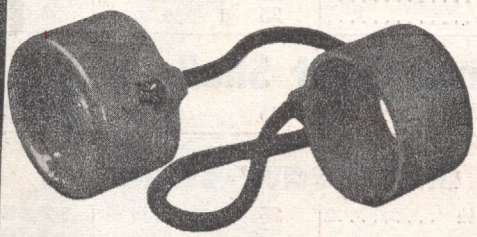
State Make, Model and Calibre of Gun When Ordering

OPEN POSITION

Pivot Mount Complete— Catalogue No. 57B04. Delivered **$14.75**

Rings Only—Cat. No. 57B05. Del'd ... **$13.50** **Bases Only — Cat. No. 57B06. Del'd** **$1.50**

The Weaver Pivot Mount has a quick pivoting action that allows the scope to be swung to the side for instant use of iron sights. It is dependable and accurate with the rigidity and strenth of fixed top mounts. Made for 1-inch diameter scopes.



Weaver Lens Caps

Made of metallic grey plastic and fit snugly over ends of scope. Transparent windows in caps permit emergency use of scope without removing caps. State power and model of scope when ordering. For Weaver scopes only.

Cat. No. 57B07— Delivered **$2.50**

TIP-OFF MOUNT

Designed for use with Model B and other ¾-inch diameter Scopes on .22 rifles having dovetail grooves cut in the receiver of the rifle. The Mount tips into the dovetail receiver grooves and is clamped to the rifle by tightening the two coin slotted clamping screws. Made of steel, neat and attractive and mounting low on the rifle, the Tip-Off Mount is rigid and dependable and attached to the rifle instantly, without the use of tools.

Cat. No. 57B08— Delivered **$2.50**

WEAVER TIP-OFF MOUNT—For scopes with 1" tube diameter. **Cat. No. 57B13. Delivered** .. **$10.00**

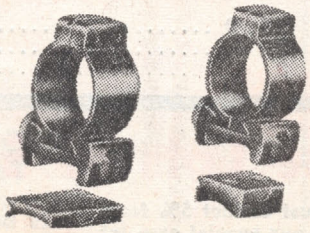
WEAVER "N" MOUNT

(Side bracket design) is pressed from tough alloy steel. Four widely spaced attaching screws and rigid clamping of the scope tube assure rigidity. Please specify type of rifle.

Cat. No. 57B09— Delivered **$2.50**

LYMAN All-American TRU-LOCK MOUNTS—

ONE-PIECE BASE
Viewed from Right Side



TWO-PIECE BASE
Famous 48 Sight lock bolt feature, in combined ring and dovetail unit, allows instant return to zero.

MOUNT COMPLETE—ONLY
Catalogue No. 57B10—Delivered **$13.00**

EXTRA BASES SET—Catalogue No. 57B11. DELIVERED **$2.00**

- **GOOD LOOKING**—Compact and sturdy.
- **CLOSE FITTING**—Mounts low to the receiver, doesn't interfere with metallic sights line-of-sight.
- **ACCURATE**—Holds zero settings.
- **QUICK REMOVAL**—Coin-slotted screws clamp to base dovetails.
- **POPULAR SIZES**—1-inch, ⅞-inch (and 22 m.m.), ¾-inch, and 1.023-inch (26 m.m.)
- **RUGGED**—Tough alloy, light in weight.
- **GUARANTEED**—Lyman backs these mounts for quality.
- **POPULAR RIFLES**—For most models.

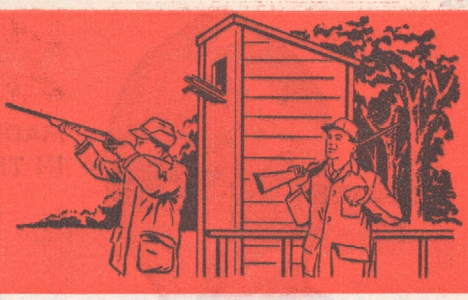
ENJOY SHOOTING ALL YEAR ROUND WITH THE

ALL-NEW TRIUS TRAP

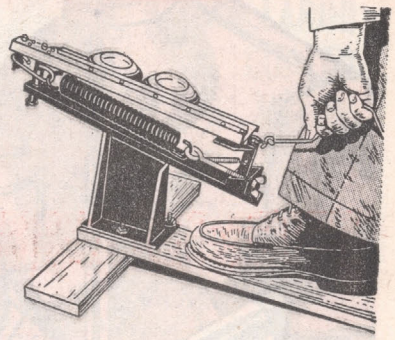
YOU CAN SHOOT ANYTIME, ANYWHERE— YOU HAVE A TRAP YOU CAN TAKE WITH YOU— YOU HAVE A TRAP THAT DOES EVERYTHING



THROWS STANDARD TRAP AND SKEET TARGETS

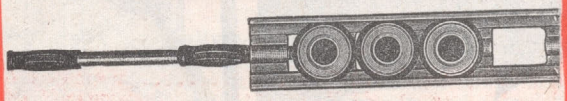
Throws regulation distances and farther. Throws single and doubles. Is lightweight—under 10 pounds. Varies angle of flight by position of target on arm. Can be fastened on a permanent base or portable mounting furnished. Is well made—steel with brass bearings and high tensile aluminum-alloy arm.

Catalogue No. 61B01—PRICE, DELIVERED **$39.50**



THE ONLY TRULY LIGHTWEIGHT (8¾ lbs.) PORTABLE MECHANICAL CLAY TARGET TRAP THAT THROWS REGULATION SKEET, TRAP AND DOUBLE TARGETS. COMPLETE WITH PORTABLE MOUNT. A mechanical clay target trap that throws regulation singles and good doubles. It can be used on portable mount (furnished) and does not have to be rigidly fastened down. The birds thrown are of club-trap quality with a steady flat flight and high speed rotation.

MOSSBERG COVEY HAND TRAP



Now you can shoot a "Covey" of double or triple targets. Light, portable, strong, no moving parts —nothing to go wrong. Long rubber lined tracks give clay birds an effective stabilizing spin to sustain flight. Weight about 1½ lbs. Handle is removable and locks inside target track for compact carrying. It's easy to operate. Targets can easily be thrown at any angle, in any direction, at various speeds. Will carry up to 60 yards. No jerk or snap of shoulders, arm or wrist required

Catalogue No. 61B02— Each, Delivered **$10.50**

WESTERN HAND TRAP

Soundly made, with regulation standard trap-shooting target carrier—the same type as that on the widely used Western ground traps for trap, skeet and practice shooting. Strong hardwood handle and leather wrist thong. Sturdy coiled spring flexible ferrule.

Catalogue No. 61B03— Each, Delivered **$7.50**

SAUCER-SHAPED BIRD TARGETS

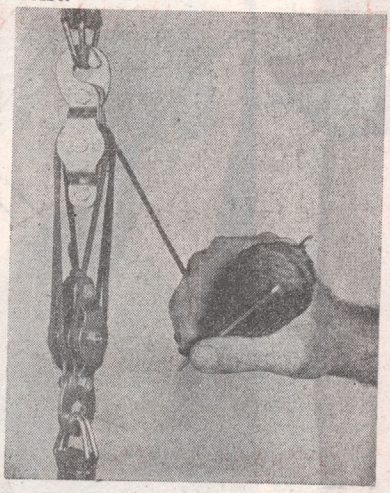
135 in carton — for standard traps. Saucer-shaped, 4½-inch diameter; black surface, half yellow top. Will break with 1 to 3 pellet hits.

Cat. No. 61B04— Carton, Delivered, **$4.75**

Special club prices on 30 or more cases, write for quotations.

GAME AND WORK HOISTS

An ideal companion for the sportsman, hunter, traveller, etc. These hoists are made of the finest metals and proven nylon cord. Perfect for lifting game, pulling cars out of ditches, lifting boats, and all other types of heavy lifting. A light, portable hoist.



Handy Hoist

With
100 Feet Nylon Cord
2 Nylon Slings
Light Reel
Wire Holder
Carrying Bag

Catalogue No. 61B05

$16.00 DELIVERED

Handy Hoist kit consists of Handy Hoist with 100 feet of nylon cord, sufficient for a 12-foot lift. Two heavy nylon slings with welded steel links, light reel to hold cord, wire holder for two blocks, canvas carrying bag. Weight: 1 pound, 6 ounces. The Handy Hoist is capable of lifting 1,000 pounds. In the event of overload, links will fracture before damage is done to either blocks or cord. All parts laboratory tested for safety. The two Lift Sling Straps are made of Nylon Tubular Webbing, having a single break strength of 3,000 lbs. Grease, Oil, Gasoline, Tar, Water, Mildew and most Acids will not affect the Nylon Cord or Nylon Webbing Straps.

HUSKY JR. HOIST

A lightweight, three-pulley hoist for handling loads up to 300 pounds, capacity up to 1,000 pounds. All-aluminum parts. 40 feet nylon cord gives 10-foot lift. Counter-locking hooks to secure load. Two 3-foot lengths of 1,000-lb. nylon rope for use where slings are needed. Three formica pulleys. Polyethylene carrying bag.

Catalogue No. 61B06— Delivered **$6.75**

ACCESSORIES FOR GUN CARE

GUNSLICK STOCK FINISH KIT

Gunslick
STOCK FINISH KIT
1. Sand Stock with medium and fine sandpaper until all grease and varnish are removed.
2. Shake Stain & Filler well before using. Apply small amount on stock and rub briskly. If necessary, additional coats may be applied to obtain the desired shade bringing out all the natural beauty of the wood.
3. Apply a small amount of Stock Finish on the pad. Rub in circular motion. Let dry 5-10 minutes before applying another coat.
4. We suggest 3-5 applications or until desired depth is obtained. Let stock stand 24 hours and rub lightly with steel wool for a satin finish.

BIRCHWOOD GUN FINISHES

MAGIC BLUER

Cat. No. 74B01— Delivered **$1.20**

For iron and steel. Produces a rich blue black rust-resistant finish that outwears the original. No after rust, no dimensional change no injury to metal.

All Birchwood Finishes possess one important quality in common — ALL ARE EASY TO USE. Many blueing compounds and stock finishes, readily available and low in cost, produce finishes of outstanding quality and beauty, **but only** when applied by skilled craftsmen with many years' experience. Birchwood Finishes reverse this situation. **Anyone** can obtain results of professional quality with Birchwood Finishes. No skill or past experience is required — the finish contains the "Know-How" and does the work. 2 fluid ounces in each bottle.

STOCK AND BARREL WAX

Cat. No. 74B02— Delivered **$1.25**

Anderol Gun Lubricants

Are Designed for Specific Use on Firearms!

GUARANTEED TO LUBRICATE IN ANY TEMPERATURE FROM 50° BELOW ZERO TO 300° ABOVE

ANDEROL GREASE—Because Anderol Gun Grease is not affected by extremes of temperature, it will not stiffen and become hard, making it ideal for lubrication of all firearms. Because grease resists wipe-off better than oil, it is ideal for lubricating inside the bolt, main spring, shotgun recoil spring, shotgun receiver spring, bolt locking lugs and firing pin head lugs. Also recommended for scope mounts, screw threads, underneath gun grips, inside holster (light coating). For period of long storage and gun display, Anderol Grease should be used.

ANDEROL OIL—To give your gun complete protection, clean and condition it with Anderol Oil immediately after use. Never put off oiling and cleaning . . . your gun can start rusting in three hours or less.

DO NOT USE A SOLVENT WITH ANDEROL . . . Solvency is a natural characteristic of Anderol Lubricants. They are not a mixture of oil and solvent.

ANDEROL Rust Preventative

IT SPRAYS ON

3-oz. Can Cat. No. 74B17 **$1.25**

16-oz. Can Cat. No. 74B18 **$3.25**

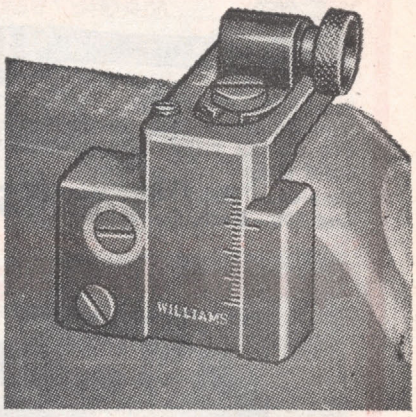
ADVANTAGES

- Maximum rust protection.
- Salt spray protection.
- Water-displacing, self polishing film compatible with lubricants.
- Removal for firing unnecessary.
- Fingerprints can be removed by polishing.
- Economical — a thin film is adequate.
- Improves appearance of gun.

New Williams Low-Priced Receiver Sight

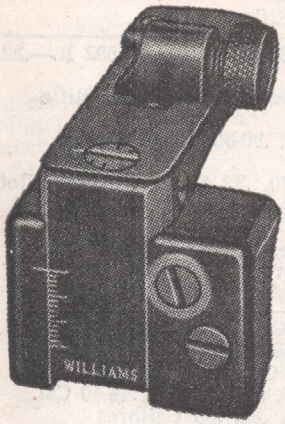
Now available for some of the more popular big game rifles —the inexpensive, quality made 5D sight. These sights are patterned after the Foolproof. They have the same strength, lightweight and neat appearance but without the micrometer adjustments. Designed for rugged hunting use, the 5D sights are dependable and accurate. Positive locks. Clear unobstructed vision. No knobs or side plates to blot-out shooter's field of vision.

Catalogue No. 75B01
$6.00
DELIVERED



5D-JEMS—For Japanese, Enfield, Mauser and Springfield.
5D-94/36—For 94, 64, etc., Winchesters; and 36-336 Marlin Lever Actions.
5D-39A—Marlin 39A Lever Action. No drilling or tapping necessary. Non-extension model.
5D-510—Remington 510, 511, 512 and 513 (some factory drilled and tapped).
5D-46M—Mossberg 46, 26, 42, 44, 50 51, 151 (factory drilled and tapped).
5D-550—Remington 550 Auto (it will also fit some of the Stevens-Savage .22s that are not drilled and tapped).
5D-56—For Marlin Levermatic and 88 Winchester.
5D-81—Marlin 80, 81 and A1 Rifles (factory drilled and tapped).
5D-87—For Stevens-Savage .22 Autos, Model 87 and 6, and other Stevens-Savage Bolt Action and Autoloading Rifles having 10-32 mounting screws.
5D-22-410—For .22-410 Over and Under Savage or Stevens.
5D-572—For Remington 572 .22 Slide Action.
5D-77—For Winchester 77, .22 Auto.
5D-760N-740—For 760s above serial number 154,965 and all 740s.

NEW WILLIAMS "FOOLPROOF" SIGHT



One of the reasons the Foolproof is so popular is that it is free from knobs and other obstructions that impair and blot-out much of the shooter's field of vision. Internal micrometer adjustments have positive internal locks—there is nothing—no exterior knobs or posts—that could be accidentally jarred or moved to throw the sight out of adjustments. The Foolproof is strong, rugged, dependable. The alloy used to manufacture this sight has a tensile strength of 85,000 lbs. Yet the Foolproof is light and compact, weighing only 1½ ounces. For big game hunting, the Foolproof outsells all other makes and models of receiver sights put together. Most guns are now being drilled and tapped at the factory for installation of the Foolproof.

Ivory Rear Sight, 5/32-inch diameter. **No. 223—Each $1.00**

Front Sight Reamer. No. 224—Each ..... 35¢

Rear Sight Reamer. No. 226—Each ..... 35¢

FOR SINGLE BARREL GUNS

Ivory Front, 11/64-inch Tap and Wrench. **No. 216—Set $2.25**

Ivory Front, 11/64-inch. **No. 217—Each $2.00**

Bi-Color Front, 5/32-inch. **No. 218—Each $2.25**

Bi-Color Front, 5/32-inch Tap and Wrench. **No. 219—Set $2.50**

YOU CAN'T MISS! with - Poly-Choke

POLY-CHOKE GIVES YOU—

- Nine different chokes—makes your favorite shotgun nine guns in one.
- The right pattern for any range, any game, any shot load—with a twist of the wrist.
- A shorter shotstring means ideal "pancake" patterns—30% more effective.
- Uniform patterns with no flyers, because Poly-Chokes control eliminates deformed shot.
- More clean kills and fewer cripples, because all of the shot reaches your target in time.
- Greater economy because Polychoke makes every shot count.

VENTILATED STYLE—Catalogue No. 78B01—Price, Delivered installed $32.50
STANDARD STYLE—Catalogue No. 78B02—Price Delivered installed $27.50

NOW WE CAN GIVE YOU.... 48 hr. Installation Service on Poly-Choke

NEW Poly-matic

GIVES YOU DOUBLE GUN VERSATILITY

Poly-matic is the only choke that can compete with a double and still give it odds. It changes the patterns as fast as you pull the trigger without ever taking the gun from your shoulder! Your first shot is at modified, your second and succeeding shots are at full—a difference that really means something! Actually Poly-matic makes your single-barrel shotgun perform like a double with a single trigger—but you still have the lighter weight and easier pointing qualities of a single . . . and you still have the three extra shots your pump or automatic holds.

Catalogue No. 78B03—Price, Delivered .....

$36.50

DYNA MAGIC

the all purpose SHOTGUN CHOKE

- Seven settings . . . finger-tip control.
- Easily adjustable without tools or wrenches.
- Reduces recoil . . . no side-blast.

12 Gauge Only **$15.00**

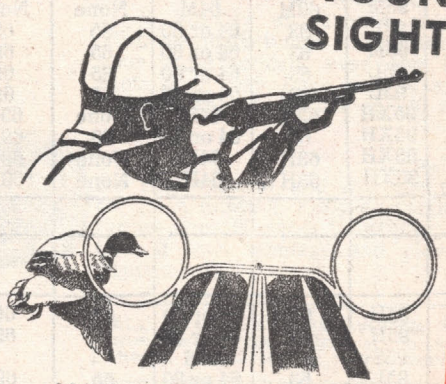
Catalogue No. 78B04—
PRICE DELIVERED .....

DYNA-MAGIC provides a complete selection of 7 easily readable choke settings from FULL to SKEET . . . performance-tested by the H. P. White Laboratory in Bel Air, Maryland. It comes ready for easy installation on **any single-barrel shotgun*** . . . provides split-second control for all-range shooting.

DYNA-MAGIC is extremely simple to operate. To select choke, always **tighten** sleeve **completely** until it **stops** with FULL setting in line with sight . . then turn counter-clockwise for more open patterns. All choke settings are contained in one complete revolution of sleeve.

INSTALLATION—On any single-barrel gun $4.00

LEADER SHOTGUN SIGHT



YOU TOO CAN BE A GOOD WING SHOT!

Fits Any Shotgun—
Slips on End of Barrel—
No Bolts! No Screws!
Cat. No. 78B05—Delivered . . **$1.25**

Takes the guess out of shotgun shooting —Figures proper lead automatically—regardless of speed or distance. **RIGHT Ring for Birds Flying From RIGHT. LEFT Ring for Birds Flying From LEFT. It's That Simple—Sight and Shoot.**

Lyman Cutts COMPENSATOR® for • TRAPS • SKEET • FIELD SHOOTING

CUTTS COMPENSATOR® gives killing shot patterns for all game at all ranges. Choice of interchangeable smooth-bore Comp Tubes, or convenient Adjustable Tube. You get maximum recoil reduction, perfectly uniform patterns even at extreme short or long range. Specify 12, 16, 20.

Adjustable Choke—Tube combines the convenience of an adjustable sleeve tube that twists to any degree of choke from improved cylinder to full choke with the perfection of the Compensator design. Continuous contact between inner and outer sleeves prevents vibration from throwing shot off. The adjustable choke tube is as rigid as your barrel. Use this tube and get more perfect patterns than with any other adjustable device! For critical shooting at extreme short or long range, choose the individual Comp Tubes.

TUBE No. 755—Popular general purpose tube. Used by skeet and field shooters.
SPREADER TUBE—Use for close range shooting of 30 yards or under . . . ideal for brush and skeet.
TUBE No. 725—Modified Choke.
TUBE No. 705—Full Choke.
TUBE No. 690—Similar to No. 680 tube except will give a slightly more open pattern
TUBE No. 680—Use for ranges 40-65 yards with heavy loads and large shot.

Tubes described above are for 12 gauge; spreader, modified and full choke tubes available for 16, 20; adjustable tube for 16 and 20.

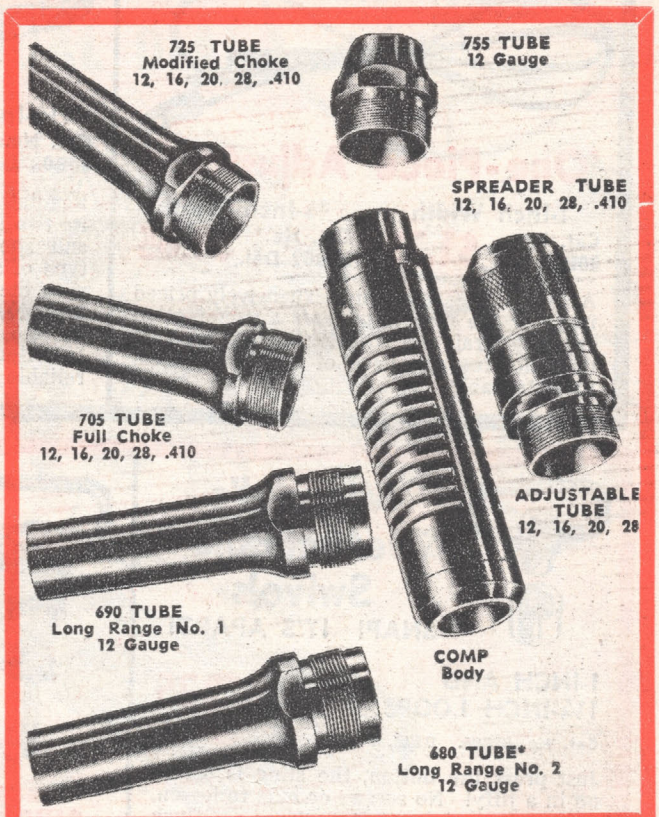
COMPENSATOR—With one tube.
Catalogue No. 79B01 ..... **$22.50**

COMPENSATOR—With adjustable choke.
Catalogue No. 79B02 ..... **$31.00**

EXTRA CHOKE TUBES—State size.
Catalogue No. 79B03 — Each **$4.50**

INSTALLATION of compensator **$4.00**

NOTE—When ordering any type of Shotgun Choke Device please state approximate overall barrel length desired so that we can install Choke to suit your requirements.



'GLOW-WORM' SIGHT

DIM or BRIGHT the "GLOW WORM" IS RIGHT

FITS ANY SHOTGUN— NO TOOLS NEEDED. **$2.50**

Catalogue No. 79B04—DELIVERED .....

After years of trial this new, easily attached shotgun sight is brought to you. A sure pointer. Gathers more light than any other shotgun sight.

Model GW1—Fits all plain barrel shotguns
Model GW2—Fits all autos with ramp sight
Model GW4—Fits all shotguns with ribs
When ordering please state model number, gauge and type of barrel on your shotgun.

GWP 3/48 —GWP 3/56 — GWP 6/48—For permanent installation. Three thread sizes: 3/48's, 3/56's, and 6/48's. Easy to install . . .unscrew front sight bead, "Glow-Worm" screws into same hole. Aligns itself by screwing tight.

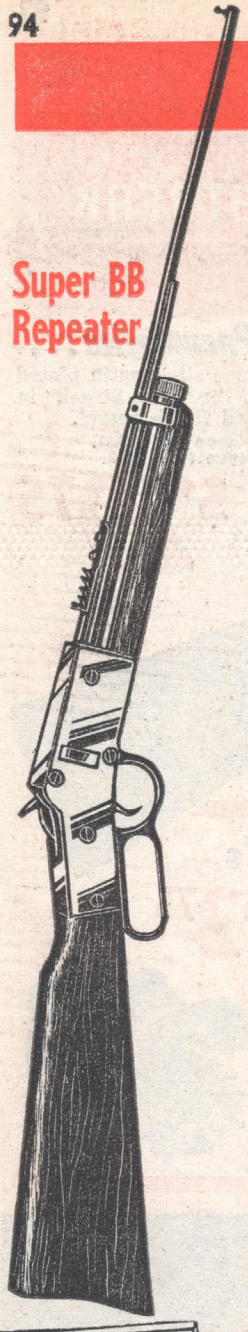
CROSMAN "PELLGUNS"



SUPER BB REPEATER GAS POWERED RIFLE

$15.75

CATALOGUE No. 94B01—DELIVERED

EXCLUSIVE MAGNETIC-SWING LOADING Positive feed in any position. Loads shots smoothly, instantly, as you flip the lever. Automatic spring-feed tubular magazine holds 30 BB's—refills in seconds. Absolutely trouble-free; can't jam or spill. Never a double load. Magnet positively positions BB's one-at-a-time, as fast as you can flip the lever.

EXCLUSIVE POWERLET GAS POWER Precision metering releases just the right amount of gas to power 100 shots from one Powerlet. No pumping or heavy spring cocking because the CO_2 gas does all the work. It's the newest thrill in BB shooting . . . quiet, effortless, and accurate, with no recoil or spring jump. Only the Hahn Super BB Repeater has it . . . and once you've tried it, nothing else will satisfy you.

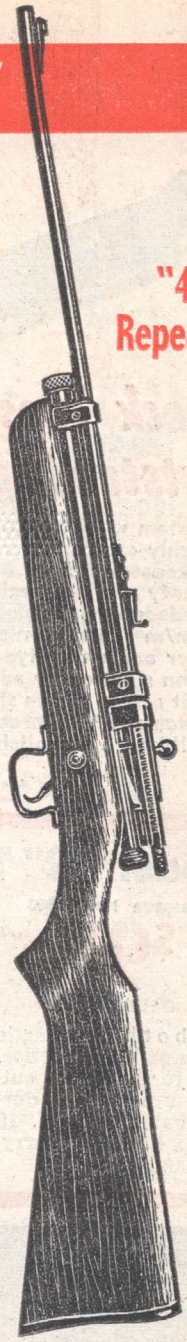
EXCLUSIVE TOP TARGET ACCURACY Now! The new Hahn Super BB Repeater brings real shooting satisfaction and accuracy to plinking, target shooting, and the official 15-foot programs. Special precision smooth-bore barrel, trued to uniform diameter. Real target sights, open rear sight, adjustable for elevation and windage; post-type front sight. Exclusive Powerlet gas power provides increased velocity, eliminates recoil and spring-jump.

EXCLUSIVE FINGERTIP LEVER ACTION Just a short, easy stroke of the lever feeds, loads and cocks with one motion. Lets you stay in firing position with the gun to your shoulder while you get off 30 quick shots. Visible hammer with safety notch at half-cock.

EXCLUSIVE REAL GUN STYLING This ultra-modern, gas-powered version of the great lever action guns "that won the west" is the first real gun in its field. Real grained wood, hand finished, straight grip stock and forearm. Standard blued heavy steel barrel. Heavy die-cast metal receiver and lever, with anti-glare mat finish. Plenty of rugged, real-gun look, feel and action for new thrills in BB shooting.

EXCLUSIVE TROUBLE-FREE DESIGN Here, at a popular BB gun price, is the first BB repeater ever made that will stay in efficient operating condition for long service. No complicated, delicate parts to break down. Just sound, simple design, dependable, highest quality parts and construction.

SPECIFICATIONS: Overall length, 34 inches. Barrel length, 17 inches. Weight, 3 lbs. Ammunition, standard lead or steel BB's. Powered for 100 shots by a single giant Crosman CO_2 Gas Powerlet.



"400" REPEATER RIFLE .22 CALIBRE PELLGUN

$27.50

CATALOGUE No. 94B02—DELIVERED

Another important advance in pellet shooting by Crosman! No more manual loading of each round. Crosman SWING-FEED LOADING does all the work . . . feeds and loads ten shots automatically . . . smoothly and instantly . . . **as you slide the bolt!** Pellets are controlled continuously as they flow from the tube clip to swing-feed and into the chamber. Crosman Load Indicator pops out . . . to show when chamber is loaded. Absolutely trouble-free. Proved by shooting thousands of rounds in field testing. Two magazine tube clips of ten pellet capacity with spill-proof caps are provided with Crosman "400" repeater.

PLUS! CROSMAN EXCLUSIVE TRU-FLYTE HEAVY DUTY BARREL . . Crosman manufactures rifle barrels with an exclusive new process, which combines special precision machining and truing with the famous button rifling found only in more expensive rifles. More efficient use of the gas power, and improved ballistics result in flatter trajectory, increased velocity, and faster spin . . . for amazing new high accuracy in pellet shooting.

PLUS! ALL THESE CROSMAN PERFORMANCE ADVANTAGES . . . Double Safety Feature: Positive push-type, cross-lock safety. Gun must be cocked after Pell is loaded in breech. **No Pumping:** Powered by two Crosman CO_2 Powerlets. Approx. 50 shots at 450 f/p/s average muzzle velocity. **Small Game Range 120 ft.,** carrying distance averages only 300 feet . . . ideal for safer shooting in limited areas.

Every gun factory-tested to group shots ½-inch or closer at 25 feet. **Walnut Finished,** well balanced, full stock. **Deluxe Rugged Target Sights,** precision made and mounted. **Easy Fingertip Cocking** . . . smooth, easy bolt action.

Gas-Powered

Shorter, Lighter and Simplified in Design

This precision-manufactured, beautifully finished, perfectly balanced rifle is available in .22 calibre (Model 160) and .177 calibre (Model 167).

- Smooth, husky bolt action.
- Automatic safety, thumb-operated.
- Blade front sight on matted ramp.
- Step adjustable sporting rear sight.
- All blued steel.
- Barrel length 20½ inches.
- Barrel diameter 9/16 inch.
- Overall length 39¼ inches.
- Weight 5 lbs.
- Muzzle velocity 700 FPS.

It shoots low-cost Crosman Super Pells. New "sport styling" gives the "140" extra beauty and perfect balance for easy, accurate shooting. Model 140, .22 calibre; Model 147, .177 calibre.

Barrel: 19½-inch precision rifled, 6 lands and grooves.

Action: Hammerless, bolt action. Enclosed loading chamber.

Safety: Positive push-type cross-lock.

Length: 35½ inches overall. **Weight:** 4 lbs. 10 ozs.

High-accuracy shooting at lower-than-ever cost. 40-50 precision shots at low power with a single Crosman CO_2 gas Powerlet; 25 shots at full power.

- Precision rifled 18-inch barrel, six lands and grooves, all blued steel.
- Hardwood stock, sport style, satin finish.
- Adjustable open rear sight; blade front sight on matted ramp.
- Covered receiver; positive push-type cross-lock safety.
- Powered by single Crosman CO2 Powerlet—up to 50 shots without replacing.
- Weight, 4 lbs.; length 34 inches.

CROSMAN SUPER PELLS

250 Pells Per Tin

TIN .22 CALIBRE
Catalogue No. 95B07— DELIVERED **90c**

TIN .177 CALIBRE
Catalogue No. 95B08— DELIVERED **75c**

The perfect, low-cost, top-performance ammunition for all Crosman Pell-guns . . . and other makes of CO_2 and air-powered rifles. Pure lead, designed to flatten on impact, do not recochet easily. Best for target shooting indoors or out. Effective for small game and pests.

CROSMAN

AMERICA'S LARGEST MANUFACTURER

Crosman is America's largest manufacturer of pellet-type rifles and pistols. Exclusive specialization in this field for over 30 years has made Crosman-built Pellguns the finest and most advanced in design, appearance and performance. The name "Pellgun" is a copyrighted trade name which distinguishes Crosman Rifles and Pistols from all other makes.

CROSMAN POWERLETS

PER BOX OF 6 POWERLETS

Catalogue No. 95B09— DELIVERED **$1.60**

Extra-capacity, disposable CO_2 gas cartridges provide uniform power for bull's-eye grouping of shots at regulation 25-foot range. Inserted in seconds in sealed compression chamber under Crosman Pellgun barrel.

A single Crosman Powerlet gives you approximately 40 shots with the Crosman Series 180 Rifle. Two powerlets in the Crosman Series 160 Pellgun Rifle provide power for approximately 40 full-impact shots. Crosman Powerlets let you get off a lot more shots per cartridge . . . with uniform power for higher-score shooting!

IVER JOHNSON REVOLVERS

INCORPORATING THE TWO NEWEST DEVELOPMENTS IN REVOLVER TECHNOLOGY:

CHROME-LINED BARREL
Now, for the first time, a guarantee of the true bullet-travel for the life of the piece. A corrosion-resistant, life-long, electrolytic lining of metallic chrome protects the bore and rifling . . . makes the barrel so rugged that wear becomes negligible; corrosion is materially reduced.

FLASH CONTROL
Another I. J. "first". Blast and hot gases are deflected forward and downward—away from shooter and bystanders—makes for comfortable shooting with companions. Muzzle end of cylinder is counterbored to provide outer deflecting rim.

.22 CAL. 8-SHOT

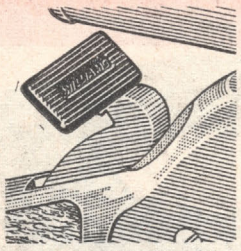
ACCESSORIES FOR SHOOTERS

Rifle Hammer Extension

Cat. No. 103B01

3.75

DELIVERED



State right or left hand model, also model number and make of gun.

For use with Winchester or Marlin rifles when a scope is mounted. Much more positive . . . faster and safer . . . a must when a telescope sight mounts over the hammer, and necessary when eye relief is critical. Not a gadget, but an improvement that gives absolute hammer control, more speed. Easy to install—just one set screw. Spot indenture in hammer with punch or drill. Excellent for either right or left hand shooters. When ordering please state make and model of gun, and whether you shoot right or left hand. Saves pinching finger when half cocking hammer manually.

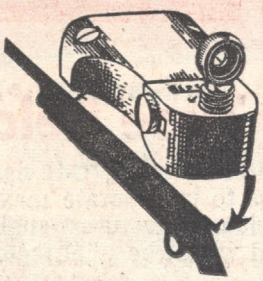
Redding Shotgun Sight

Model "P"

For Shotguns with Curved Receiver.
Cat. No. 103B02
Each, Del. . . **$6.50**

Model "B"

For most Bolt-Action shotguns.
Cat. No. 103B03
Each, Del... **$3.75**



When Ordering Please State Model, Number of Your SHOTGUN AND PROPER SIGHT Will Be Sent—
Installation of Above Sight $2.00

A Redding Shotgun Sight properly installed on your shotgun will vastly improve accuracy and will greatly increase your confidence and satisfaction in your gun. For deer hunting, sight-in your slugs at 50-75 yards. For bird or rabbit shooting, use sight as an aid to pointing.

AUXILIARY CARTRIDGE

Places the pistol cartridge at the forward end of shell chamber for firing. Bullet takes rifling on being fired, does not strip and become deformed; does not lead the barrel. It allows the use of cheap ammunition for small game or target shooting in a large, high-power rifle. Perfectly harmless to any part ofthe rifle. Can be used through magazine if desired.

This amazing silicone and polar compound affords rust protection heretofore unknown. Guaranteed for one year outdoors, and five years indoors. Guaranteed for all metal subject to damage by rust.

C-H RELOADING TOOLS

C-H Magnum "H" Type Reloading

Keeping the reloader's requirements first in mind, C-H has designed the C-H Magnum "H" Type Reloading press to incorporate maximum strength with positive alignment. The so-called luxury features, slight in value but substantial in cost, have been eliminated while the vital factors of construction have been concentrated upon.

The C-H Magnum Press is of simple straight line, rugged design, particularly adapted to heavy operations requiring a high degree of accuracy. The two upright posts assure **positive** alignment of the case holder to the die with the thrust of the tool located directly under the case holder. The upright columns are **ground** and **chrome-plated** to give lasting wear and corrosion resistance. The stroke is 3⅞ inches, more than adequate for loading the longest cases. The priming arm has an adjustable stop that may be used to control the exact seating depth of the primer. The C-H Magnum press **guarantees** perfect ammo, consistently uniform, a credit to yourself and the art of handloading! This is the king of the reloading presses!

C-H Shot Shell Reloading Press with Dies $80.00

CATALOGUE No. 104B12. PRICE, DELIVERED .....

Exclusive, patented features make this press a handloader's dream come true! Years of exhaustive research and consultation with some of the best experts in the business have been incorporated into a tool that delivers a perfect shell every time.

Look at these patented features not found in any other tool: Shot Shell cases are fully sized including rim to insure perfect operation in all guns, including automatic shotguns. The old primer is removed automatically, and the new one is always seated firmly and flush with the headspace line. Irons case externally and internally. The special primer inserting base with spring loaded holder guides the primer perfectly and safely into the pocket. The entire wad column is seated in one operation. The wad punch is spring-loaded and pushes wads out of the guide through spring fingers without snapping or binding. One stroke of this amazing NEW shot shell press returns a perfect folded star crimp to a once-fired shell, saving you many dollars.

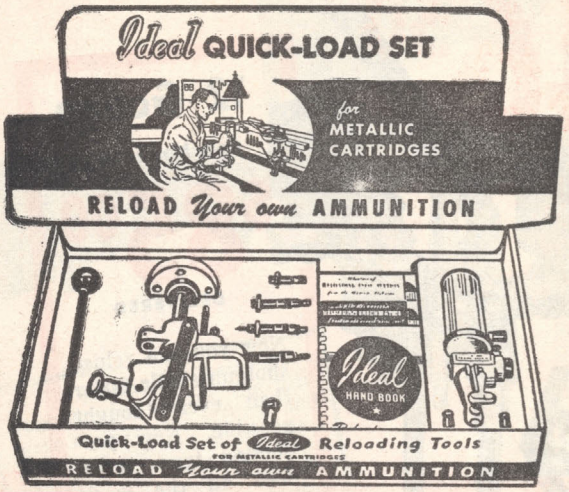
Cat. No. 105B06—Powder—DEL. ...

THIS IS THE MEASURE THAT EVERYONE HAS BEEN ASKING FOR

No adjustments are necessary. One drop tube for powder and one drop tube for shot. You can't make a mistake or get the wrong weight of powder with this measure. The low powder column and large capacity hopper assure you of completely uniform charges and still enough powder to load 4 boxes of shotshells without refilling. One push of the plunger gives you powder or shot—a perfect measure for the shot shell loader.

LYMAN Ideal RELOADING TOOLS



IDEAL QUICK LOAD SET — $60.00

Catalogue No. 106B01—DELIVERED .....

Designed to produce large quantities of accurate ammunition in a short time. The complete set of dies are mounted in the turret head and, when progressing from one stage to the next, the reloader merely rotates the turret to bring the desired die into operation. An added advantage of this set is that the dies need only to be adjusted once—they do not lose their setting as do dies that are removed and re-installed in other makes of tools. Set contains: The Ideal True-line Jr. Reloading Press, a complete set of dies for one particular calibre; an Ideal No. 55 Micrometer Powder Measure, the latest edition of the Ideal Reloading Handbook; and two supplements, Nos. 1 and 2, issued by the American Rifleman Magazine. Set of Dies consists of: Shell Holder, Priming Punch, Double Adjustable Chamber, Bullet Seating Screw, Combination Muzzle Resizer, Combination Decapping Rod, Combination Expanding Buttons. Please specify calibre when ordering.

IDEAL ECONOMY SET — $45.00

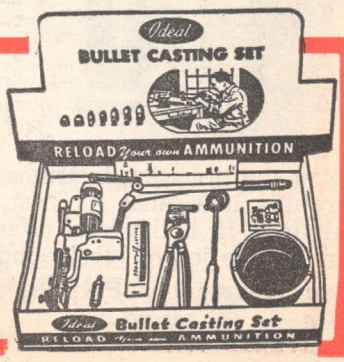
The Bullet Casting Set includes: an Ideal No. 45 Bullet Lubricator and Sizer with Sizing dies for one bullet style; a Single Cavity Bullet Mould for any solid base or point Ideal Bullet design desired; a Lead Pot; Lead Dipper; 3 lbs. of Bullet Metal; and Gas Checks when required.

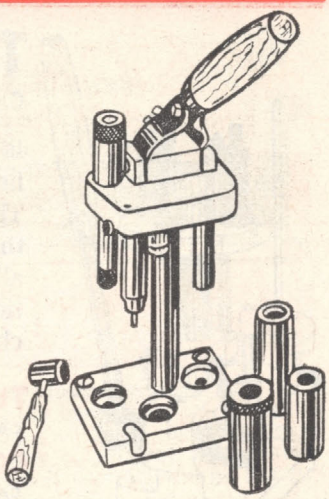


LYMAN SHOT SHELL Reloading Equipment

NEW!

THE "VANDALIA" Shotshell Reloading Set $46.50

Catalogue No. 107B01—DEL'D ...



Completely new, this high-speed shotshell reloading outfit is especially designed to produce large quantities of precision shotshell handloads. Here is a powerful bench press which performs all operations, including full-length resizing, with equal ease and speed.

Accurate wad-seater pressure gauge is built in—assures precise seating of wads so necessary for uniform performance from shell to shell. The new VANDALIA also features a newly designed crimping plug which produces perfectly finished shells even for the beginner. This press converts readily from one set of shotshell dies to another. Each set consists of Full-Length Resizing Die, Crimping Chamber, Crimper, Wadding Chamber, and Decapping Rod. The new VANDALIA die sets are available in 12, 16 and 20 for 2¾-inch shells using "New Style" crimp. Die sets for 12 and 20 gauge also reload the 3-inch Magnum shells. The new VANDALIA is one of the fastest devices of its kind. The average reloader can turn out from 50 to 75 units per hour. Best of all, this high-speed set is remarkably low in cost.

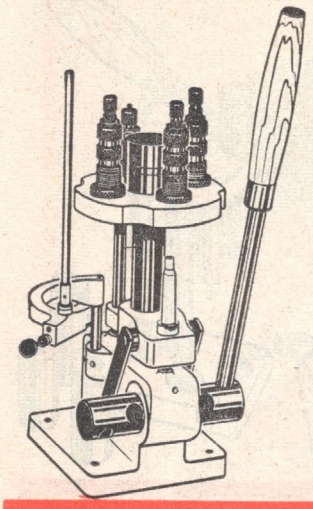
LYMAN RELOADING TOOLS PRESSES & DIES



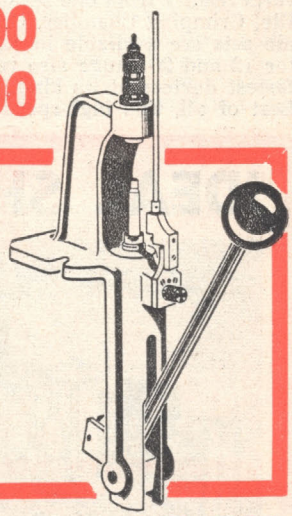
TURRET RELOADING PRESS

Catalogue No. 108B01—PRICE, DELIVERED **$60.00**

Is the champ for reloading rifle, pistol and shot-shells, the easy way. The die turret head permits complete reloading of a cartridge without removal from the shell holder. There's even a turret station for the No. 55 Ideal Powder Measure with the new threaded drop tube. In every detail the Turret is a "dream": tremendous power for all operations; reversible handle for upstroke or downstroke; quick-change in operations with adjusting dies; optional "push-button" primer feed. All-American 7/8" x 14 chrome-plated dies are used in this press, or Ideal Dies with a 7/8" x 14 Adapter Die.

TURRET PRESS AUTOMATIC PRIMER FEED.
CATALOGUE No. 108B02—PRICE, DELIVERED **$13.00**

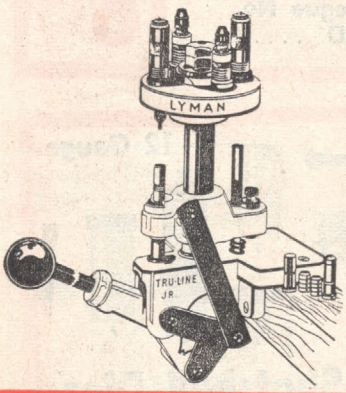
COMET PRESS AUTOMATIC PRIMER FEED.
CATALOGUE No. 108B03—PRICE, DELIVERED **$9.00**



COMET RELOADING PRESS

Catalogue No. 108B04—PRICE, DELIVERED **$33.00**

Quickly and accurately reloads rifle, pistol, and shot-shell cases. All operations from full-length case sizing or bullet seating are performed. The Comet can be used with upstroke or downstroke pressure by a simple adjustment of the handle lever bar. The optional "Slip-in" primer feed automatically drops a primer into position so the reloader never has to slow down. All-American 7/8" x 14 chrome dies are used in this press, or Ideal Dies with a 7/8" x 14 Adapter Die. The All-American Comet is truly a remarkable buy with its ruggedness, versatility and low cost.



TRU-LINE JUNIOR PRESS

Catalogue No. 108B05—PRICE, DELIVERED **$21.00**

Bench reloading press produces accurate and reliable ammunition with a minimum of effort and time. It uses any standard Lyman Ideal Dies, with the exception of the No. 310 Tool priming chamber. In place of this the priming punch and shell holder are used. The self-centering turret head can be set up for either one or two calibres at one time, depending on whether the new combination dies or the individual No. 310 Tool-type dies are used. This press is very fast and requires a minimum of set-up time. Once the dies have been placed in proper position, hundreds of cases can be processed without changing the dies. The No. 55 Powder Measure can be mounted in turret along with dies to complete the reloading cycle to be carried out on a single case without adjustment.

DIES FOR RIFLE SHELLS ONLY
Catalogue No. 108B06— Set Delivered **$13.00**

DIES FOR PISTOL SHELLS ONLY
Catalogue No. 108B07— Set, Delivered **$15.00**

310 HAND TOOL WITH DIES $22.00

Catalogue No. 108B08—DELIVERED .....

Performs reloading operations on metallic pistol or rifle cartridges with Ideal dies. Handy for use at the rifle range or a hunting trip. No. 310 Tool handles are equipped with an adjustable extractor hook so that many types of rimmed or rimless cases can be processed in the same handles. The Adapter Die allows many cartridges to be reloaded in the same set of handles, since a correct-size adapter is furnished with each set of different cartridge dies.

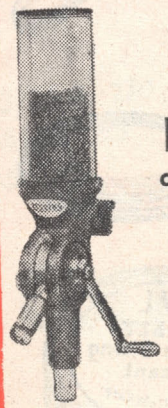
REDDING POWDER MEASURES and SCALE



Master Powder Measures

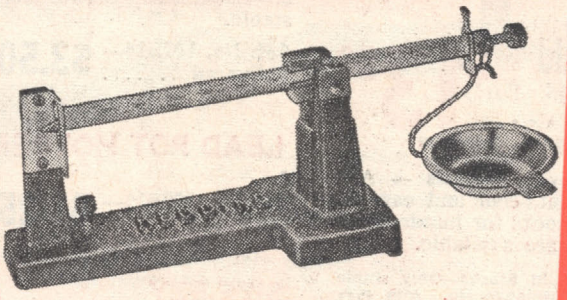
Catalogue No. 110B06.

$24.50

DELIVERED

Chrome-Plated on Critical Areas

Easy measurement of rifle, pistol and shotgun powder charges ranging in weight from ½ to 100 grains. Simple and easy to operate and is provided with micrometer-set measuring chamber, with lock screw to keep charge at setting selected. A chart is supplied with measure, showing normal range of charges of each type of powder and setting used to obtain these charges.



Powder & Bullet Scale **$16.50**

Cat. No. 110B07—DELIVERED

Clearly graduated each side of the main bearing —each graduation at left equalling five grains and each graduation at right equalling one-tenth grain, for a total capacity of 325 grains. Pointer at left end of beam indicates a tenth grain over and under scale—eight-tenths each side of zero. Counterpoises are of solid brass, uniformly adjusted. All bearings are hardened and honed and are completely self-aligning, eliminating rubbing and side friction. Pan and hook are burnished aluminum and base is cast iron finished in brown wrinkle enamel and is provided with levelling screw. Each scale is individually tested and adjusted against U.S. Bureau of Standards approved master weights and guaranteed accurate to a tenth grain.

Standard Powder Measure

Catalogue No. 110B08.

$16.50

DELIVERED

Capacity from 0 to 100 Grains

The Redding Standard Powder Measure will throw accurate charges of all sporting powders with great ease and speed of operation. The metering chamber is removable, and, after a charge has been thrown, the powder is poured directly from the chamber into the cartridge case. Large capacity reservoir, chrome-plated adjustable metering chamber, positive mounting bracket, and attractive wrinkle finish.

PREFERRED BY HUNTERS EVERYWHERE...

Hornady Bullets

Preferred for their deadly dependability at all hunting ranges. Hornady *Spire Point* Bullets are killers at long range. Hornady *Round Nose* Bullets are real brush-busters in timbered country. The only bullets made in tungsten carbide dies—unmatched for uniformity and accuracy. A complete selection for handloaders.

None so deadly with equal accuracy.

Bullets photographed actual size. Cannelured as shown. All Prices Quoted are Delivered

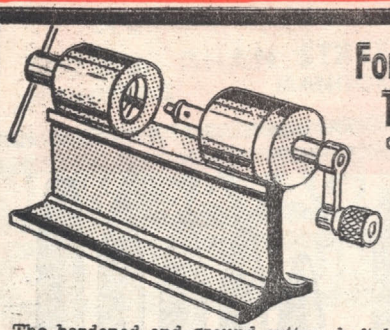
RELOADING ACCESSORIES



Forster Case Trimmers

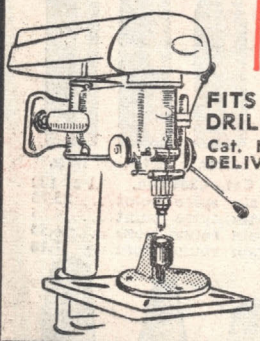
COMPLETE FOR ONE CALIBRE

Cat. No. 114B01 **$17.00** DELIVERED

The hardened and ground cutter shaft has four slightly staggered edges to provide chatterless cutting. It turns in a hardened, ground and honed bearing, to which the shaft is fitted without play. A lock ring on the cutter shaft prevents it from slipping out accidentally. The hardened pilot runs true, is easily interchangeable either with another of different calibre or an inside neck reamer. The desired length of the case is set by means of the stop collar on the shaft and for fine adjustment, within .001" or less, a stop screw in the collar is provided. Adjustments once made, remain set.

Additional Pilots — State Calibre—Cat. No. 114B02—DEL. 60¢

Additional Collets — State Calibre—Cat. No. 114B03—DEL. $3.00



NEW! POWER-DRIVEN CASE TRIMMER

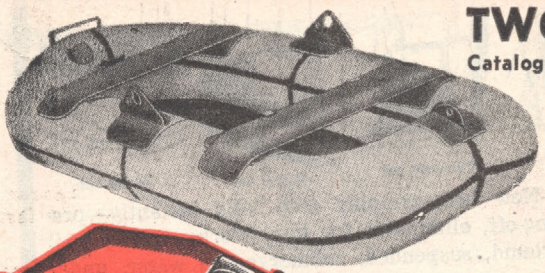
AIRUBBER INFLATABLE BOATS

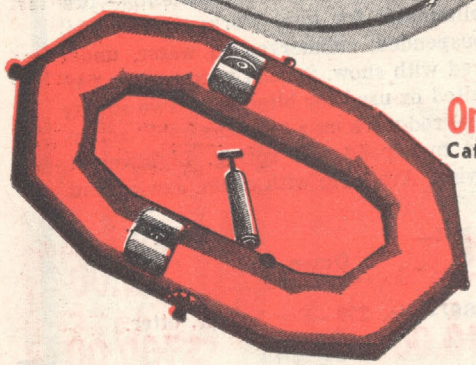
NO BOAT TRAILER or CAR TOP CARRIER NEEDED



TWO-MAN BOAT, Model S-40

Catalogue No. 118B01—DELIVERED **$165.00**

Versatile, rugged, has built-in motor mount to take outboard motors to 3 h.p. Equipped with oar-locks, inflates in two separate compartments. Snag-resistant nylon with high tensile strength; seats and bottom made of heavy coated belting duck. Dark green. Flap seats. Length, 7½ ft.; width, 3 ft. 8 ins.; inside width, 1 ft. 7 ins. Weight, approx. 28 lbs., including pump, wooden transom board for use with outboard motor and pair of jointed aluminum alloy oars. Deflated dimensions: 39 x 20¾ x 8¼ inches.

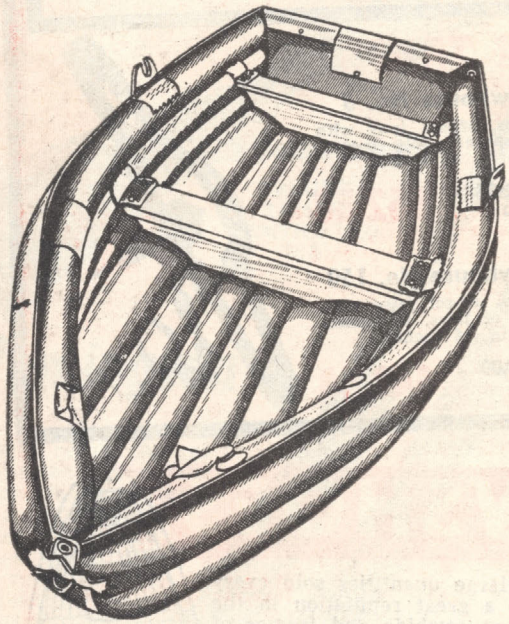


One-Man Boat, S-20

Catalogue No. 118B02—Del'd .. **$64.50**

A brand new, lightweight NYLON snag-resistant inflatable rubber boat. Made like the government one-man raft except both ends are the same large size and heavy rubberized belting duck bottom is provided. Dark green. Repair as an inner tube.

Can be used for fishing or as a play boat. Loops permit complete encirclement with lifeline. Equipped with oarlocks. **Length:** 5 ft. 7¼ ins. **Width:** 3 ft. 5 ins. **Inside Width:** 1 ft. 6 ins. **Weight:** Including inflation pump and one lightweight jointed aluminum alloy oar—13 lbs. Deflated dimensions: 19 x 18½ x 5½ ins.



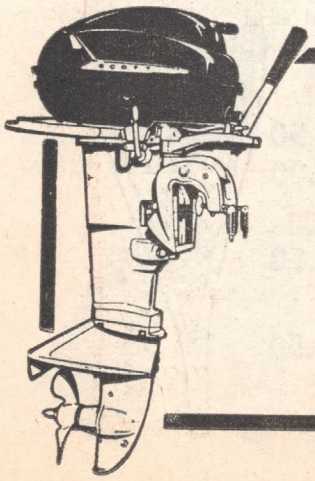
3 or 4 Men

MODEL R80—
Cat. No. 118B03—Del'd **$295.00**

Just takes a few minutes to pump up. Use it anywhere—will outlast any standard wooden boat.

It's the boat for sportsmen; ideal for duck shooting and fishing; use as a dinghy or lifeboat. Inflated will not mar varnished decks; deflated can be stored in a small space. Pack in car trunk, carry in trailer or plane. Color dark green.

An entirely new dory-style inflatable rubber boat, each side and bottom a separate compartment. Rides rough water; multiple keel bottom checks drift. **Built-in motor mount takes outboard motor to 5 h.p.** Built of inflatable air-cells of "tough-as-hide" construction. Inflates in 10 minutes. Weight: 75 lbs., includes wooden transom board, boat pump, pair of lightweight jointed aluminum alloy oars, two seats and carrying case.



5 H.P. Scott Outboard

Catalogue No. 118B04—DELIVERED ... **$275.00**

DELIVERED

VANGUARD FIBERGLAS BOATS

LIGHT IN WEIGHT YET TOUGH AS STEEL

FISHERMAN STANDARD $299.00

Catalogue No. 119B01—DELIVERED .....

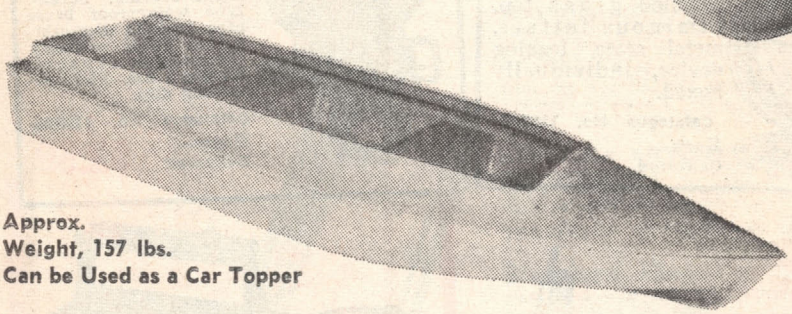
Contains no seams or joints to leak. The moulded-in spray rails effectively force spray down and away from the boat, and act as supports for the moulded-in seats. These seats also act as buoyancy chambers and are vented so that condensation can be run off simply. The deep bow gives an added degree of safety in rough weather, as does the adequate beam and transom width.

SPECIFICATIONS—Centre line length, 12 ft. 6 ins.; beam, 52 ins.; depth amidship, 23 ins.; transom width, 47 ins.; transom height, 15½ ins.; maximum horepower, 10.

Approx. Weight, 180 lbs.

Moulded in One Piece in a Continuous Operation

Write in now for our complete listing on top quality canoes, cedar strip with canvas covering, also complete fiberglas models.



Approx. Weight, 157 lbs.
Can be Used as a Car Topper

SPORTSMAN STANDARD $289.00

Catalogue No. 119B02—DELIVERED .....

Has all the qualities of much larger boats coupled with a low price and weight. Although boasting a 62½-inch beam and 50-inch transom it is narrow enough across the combings to use as a car topper. Air tanks are built in for added safety Available in colors drab for hunting. **SPECIFICATIONS**—Centre line length, 11 ft. 1 in.; beam, 62½ ins.; depth amidship, 18 ins.; transom width, 50 ins.; transom height, 15¼ ins.; maximum horsepower, 10.

USE BOWS AND ARROWS OF THE RIGHT WEIGHT AND LENGTH

Spread arms out shoulder high and measure distance between finger tips, then use following chart:

Spread Measurement inches	Arrow Length inches	Suggested Bow Length
57 to 59	22 to 23	Not Under 4' 6"
60 to 62	23 to 24	Not Under 4' 6"
63 to 65	24 to 25	Not Under 5'
66 to 68	25 to 26	Not Under 5'
69 to 71	26 to 27	Not Under 5' 6"
72 to 74	27 to 28	Not Under 5' 6"
75 to 77	28 to 30	Not Under 5' 9"

Above chart applies to wood bows only; fiberglas bows can be up to 6 inches shorter.

THE RIGHT WEIGHT FOR YOUR BOW

Most Men—35 - 45 lbs. draw weight. Most Women—20 - 30-lb. bow. Hunting bows run approx. 10 lbs. heavier.
